

**// NEW: break-in-resistant WK 2 security equipment
for all doors, side elements and transom lights**

Aluminium Entrance Doors

Enjoy convenience and security for your home

Hörmann entrance doors for your home

Your new entrance door should be very special. It should match the style of your home and be prestigious, expressing your excellent taste. At the same time, your entrance door should also meet high security standards and help save energy with high thermal insulation values.

Aluminium doors are an excellent choice

You will soon notice that aluminium doors are superior to plastic and timber doors in many ways. Other than the many technical equipment and design options, you can enjoy a number of additional advantages:

- High acoustic insulation,
- High thermal insulation,
- High security,
- High stability,
- No follow-up painting necessary, the doors look as good as new after many years of service.

The fast-track programme

The shown door styles are available in the fast-track programme with a **delivery time of approx. 8–13 business days** as **TopComfort** or **TopPrestige** entrance door versions with the handles shown.

The Vario programme

The entrance door styles in the brochure are also available in the **TopPrestigePlus** version with a delivery time of approx. 30 business days.

In addition you can freely design all entrance door styles (TopComfort, TopPrestige, TopPrestigePlus) according to your own wishes. Choose your individual handle, colour or glazing.

Break-in-resistant WK 2 version // NEW

All Hörmann TopComfort, TopPrestige and TopPrestigePlus Aluminium entrance doors, side elements and transom lights are now available in a **break-in-resistant WK 2 version**. Only Hörmann offers this type of additional security for the entire entrance door range. More information on this can be found on **pages 8 and 9**.

11 colours for the same price // NEW

All of the entrance door styles are now available in 11 equally-priced preferred colours. More information on this can be found **on pages 30–31**.

For more information on aluminium entrance doors and other Hörmann quality products, visit **www.hoermann.com**.

Enjoy quality from a single source – without compromises

Made in Germany

All entrance door components are developed and produced in-house at Hörmann. Our highly qualified employees work intensively on new products, continual further developments and improvements to details. Patents and unique products on the market are the result of this. You can depend on it: endurance tests under real conditions ensure mature series products with Hörmann quality.

Certified brand quality

CE mark according to EN 14351-1

The CE mark confirms compliance with and observance of the principal requirements of the EC directives according to EN 14351-1 for all of our entrance doors.

Quality assurance system according to DIN ISO 9001

Hörmann's entrance door production is DIN ISO 9001 certified. One more example of the Hörmann motto: "Quality without compromise".

Long-lasting. Guaranteed.

We are convinced of our products and our uncompromised quality assurance. That is why we issue a 10-year guarantee* on all Hörmann entrance doors.

* The complete warranty conditions can be found at: www.hoermann.com

The colours and surface finishes shown are subject to the limitations of the printing process and cannot be regarded as binding.

All rights reserved. No part may be reproduced without our prior permission. Subject to changes.

All prices stated in this brochure are the manufacturer's recommended retail prices (incl. 19%VAT). All offers are valid from 01.03.2010 until further notice.

TopComfort

The inexpensive basic version

TopComfort doors offer you equal degrees of design and functionality – the all-round profiles are precisely connected and mitred at the edges, creating a harmonic frame around the styled infill, which is precisely framed by the leaf profile (1). The view of the interior shows the door infill with rounded beads and the trim with a discreet grey seal (2).

Exterior view

Interior view

Good thermal insulation

The 80-mm-thick profile system with thermal break and the 30-mm-thick infill ensure good thermal insulation. Depending on the style, we offer you TopComfort entrance doors with a U-value of up to 1.4 W/m² K. This allows you to save heating costs and enjoy a comfortable atmosphere at home.

Double thermal insulation glazing

Even with entrance door styles featuring large glazed areas, you do not have to fear excessive energy loss. This is because the standard thermal insulation glazing offers you a compelling U-value as low as 1.1 W/m² K.

Optimally adjusted

The beautifully designed three-way hinges allow the TopComfort entrance door to be variably adjusted. This way, your entrance door is optimally sealed and falls smoothly and securely into its lock.

TopComfort with three-way adjustable hinges. Also available with concealed hinges.

Exterior view

Interior view

Section view of TopComfort

Fast-track programme

TopComfort

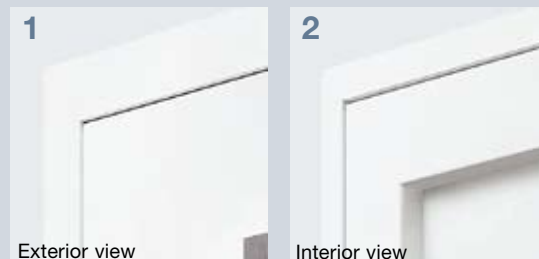

Delivery time approximately 8 business days for single-leaf entrance doors (max. 1250 x 2250 mm) with the shown or described handles, colours and glazing.

Delivery times approx. 13 days for entrance doors with fixed side elements and/or transom light and/or letter box system.

TopPrestige

The elegant leaf-overlapping version

In the TopPrestige version, the infill design is mounted onto the leaf profile, thus appearing generous and elegant when viewed from the outside (1). Inside, it has a pleasing slim leaf profile without strips and without a visible seal (2).

Exterior view

Interior view

High thermal insulation

The glued composite structure of leaf and style infill of the TopPrestige versions offers you an entrance door with very high thermal insulation. Its thermal break profile system and the PU-foamed infill ensure that barely any heat escapes to the outside. Depending on the style, we offer you TopPrestige entrance doors with a U-value as low as 1.3 W/m² K.

Double thermal insulation glazing

For TopPrestige entrance doors with large glazing areas you receive a version with top thermal insulation values. They give you the benefit of thermal insulation glazing as standard with a U-value as low as 1.1 W/m² K.

Created for comfort

The beautifully designed three-way hinges allow the TopPrestige entrance door to be variably adjusted. You can always rely on your entrance door being optimally sealed and falling smoothly and securely into its lock.

TopPrestige with three-way adjustable hinges. Also available with concealed hinges.

Section view of
TopPrestige

Fast-track programme

TopPrestige

Delivery time approximately 8 business days for single-leaf entrance doors (max. 1250 x 2250 mm) with the shown or described handles, colours and glazing.

Delivery times approx. 13 days for entrance doors with fixed side elements and/or transom light and/or letter box system.

The premium entrance door: best thermal insulation and design

TopPrestigePlus

Added thermal insulation and design

With the TopPrestigePlus entrance doors, you can enjoy the highest degrees of comfort. This is because TopPrestigePlus versions are distinguished on the outside (1) and the inside (2) by infills overlapping the leaf. The flush-fitting interior view of the door harmoniously matches the doors of your home.

Use the thermal insulation that sets benchmarks

TopPrestigePlus entrance doors feature an 80 mm thick profile system with thermal break and a 70 mm thick insulated style infill. With thermal insulation values of up to 1.0 W/m² K, they are especially suited for fitting into energy-efficient houses.

For your additional comfort: triple thermal insulation glazing

Enjoy triple glazing with a U-value of up to 0.7 W/m² K. Minimising heat losses whilst saving energy and money.

Standard: concealed hinges

The hinges are concealed in the TopPrestigePlus version, i.e. they cannot be seen from the inside or outside – an elegant solution for your home. The door leaf can be adjusted easily and conveniently, making it possible to close your entrance door comfortably and securely at any time.

Vario programme

TopPrestigePlus

Surcharge of € 650 on all single-leaf TopPrestige entrance doors with glazing, € 500 on single-leaf TopPrestige entrance doors without glazing (all up to 1220 x 2220 mm) with the shown or described colours, handles and glazings.

Delivery time approx. 30 business days

The look: fascinating

Rounded fascia frame, optional for all entrance door styles

For a particularly balanced look, we optionally offer you all entrance door styles with a rounded fascia frame as an additional outdoor design element. This stylishly enhances your entrance door, giving it a particularly harmonious look with rounded edges. Rounded fascia frames are delivered as standard with Golden Oak versions.

For a harmonious look and a design element at the same time – included as standard for all entrance doors with Golden Oak surface.

The additional fascia frame extends the depth of the frame profile to 97 mm.

This is security you can count on

Our entrance doors offer you high 6-fold protection as standard

When it comes to security, you can also rely on the high quality of Hörmann doors – the H-5-Automatic special security pivoting bolt lock (included as standard) provides your home with quality-tested 6-fold protection (for more information, see page 10). All entrance doors, side elements and transom lights are now optionally available with break-in-resistant WK 2 equipment.

Optional: break-in-resistant WK 2 security equipment for entrance doors, side elements and transom lights

Feel safe in your home

You can now add optional WK 2 equipment to make Hörmann's already-secure entrance doors even safer. Hörmann is the only one that can provide you with complete WK2 entrance door systems, consisting of an entrance door, side element and transom light.

Tested security

WK 2 certification is issued by an independent test centre. This is carefully tested security that provides your home with additional protection against uninvited guests.

Invisible break-in-resistant security equipment

The optional WK 2 equipment consists of a special door version that includes drill-resistant locking cylinders, as well as P4A security glazing for all elements, i.e. entrance doors, side elements and transom lights. The optional WK 2 equipment cannot be seen on the door, providing you with a secure and attractive entrance. After all, the entrance door is the "visiting card" for your home.

WK 2 security equipment For TopComfort, TopPrestige and TopPrestigePlus

All Hörmann entrance door models, side elements and transom lights are available with WK 2 security equipment, each for a surcharge of only

275 €

This is security you can count on: high 6-fold security as standard

Standard 5-point automatic lock

The H-5 automatic lock is a mechanical, self-locking multiple lock. The lock engages as soon as the entrance door is pushed into the latch.

When locking, 3 steel hooks with 2 additional bolts pivot into the stainless steel lock plates to automatically lock the door. In addition, a stainless steel bolt on the hinge side engages with the fascia frame.

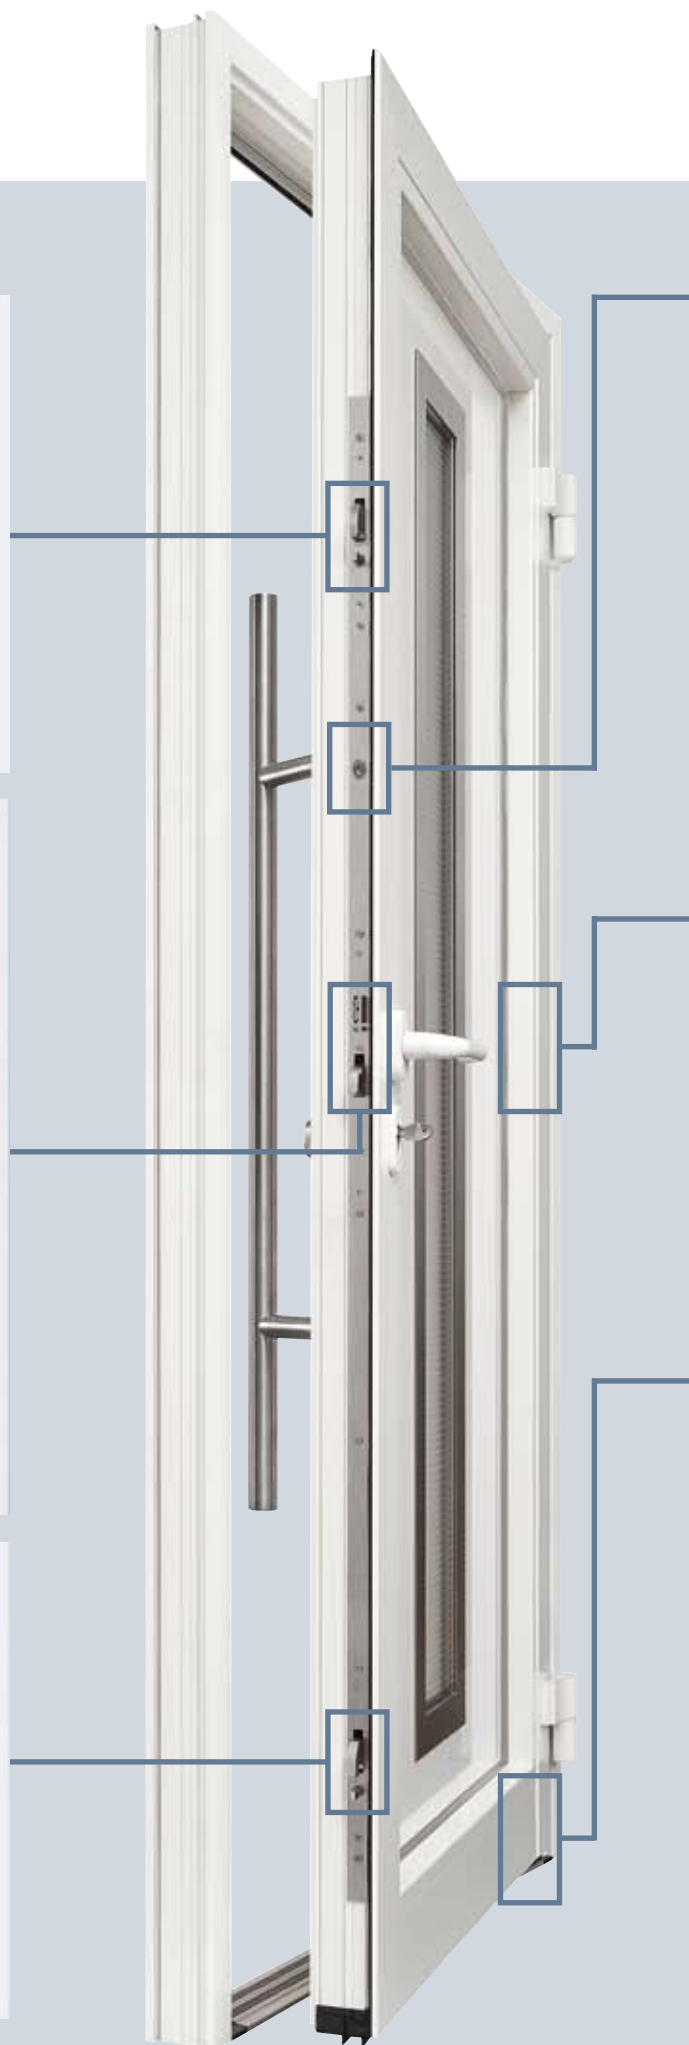

To open the door, either use the lever handle or open it with a key.

Further options: child safety/holiday function, where the door is double locked with the key.

The lever handle does not function, so the lock can no longer be opened with it.

Variably adjustable: Hörmann door strikes (optional)

The electric door strike catch in the lock plate ensures that your guests can only enter your home if you push the electric door strike inside. During the daytime, and if the self-locking function of the H-5 automatic lock is off, you can also toggle the locking lever so that the entrance door can be opened by a slight push from the outside.

Standard equipment

Switch lever

To optionally switch off the automatic self-locking function. This makes it possible to open the door using a Hörmann electric door strike.

Beautifully designed interior lever

Standard in stove-enamelled white or optionally in stainless steel or RAL to choose.

Solid security bolt

A stainless steel bolt engages during locking with the fascia frame. This way, it protects the door on the hinge side from being leveraged or pushed in.

Beautifully shaped security rose escutcheon

These protect the profile cylinder from being drilled open and twisted off. Available as standard in Traffic white RAL 9016 or in stainless steel for the surface finishes Golden Oak and Anthracite.

Threshold with thermal break

Extremely robust, 80 mm thick and offering thermal insulation – the entrance door threshold with thermal break and concealed bolting to the bottom. In silver EV1.

TopPrestige style 40 TP in the preferred colour Ruby red RAL 3003

Discover your new entrance door

And a programme that has much to offer

Choose according to your own wishes from 3 different versions and receive an individual look with thermal insulation: The inexpensive basic version TopComfort, the elegant leaf-overlapping version TopPrestige, or the TopPrestigePlus version with additional thermal insulation and design. No matter which version you choose – you will always receive top quality “Made in Germany”.

At the focus of your attention

Matching entrance doors and garage doors

We think along with you in terms of design. This is why we offer you the elegant lines of the ribbed look – a Hörmann garage door classic for many decades – also matched to the design of the Hörmann entrance doors. A visual accent that effectively highlights the stylish overall appearance of your home.

Perfectly matched: entrance door styles and sectional garage doors, M or L-ribbed

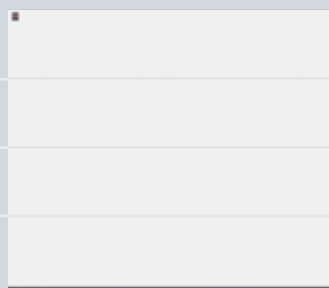

Discover harmonious, aligned design

The large Hörmann matching programme provides you with aligned entrance door and garage door ribbing options for a matching appearance. The result: no optical offset from the base line. You will see: the beauty of your home is reflected in these small but crucial details.

TopPrestige entrance doors:

- Style 875 TP
- Style 895 TP
- Style 898 TP

Quick and clean within a single day

Professional and competent entrance door modernisation

The modernisation of your new entrance door is easier than you would expect. This is because your Hörmann partner offers you an all-round competent service. Starting from consultation via measurement up to the fitting, including the disposal of the old door. Faster than you would expect, your home receives a new look. A decision that is sure to please you for a long time.

**Out with the old door,
in with the new:
fast and clean
on the same day.**

Hörmann entrance doors in the fast-track programme with a delivery time of approx. 8–13 business days.

The renovation of an entrance door is a routine task for Hörmann professionals, which they can handle quickly and cleanly on a single day. The measurement at your home and the selection of the new door is soon followed by the modernisation process. Step 1: Your old door is professionally and cleanly dismantled and disposed of in an environmentally-friendly manner.

Step 2: The new Hörmann entrance door is fitted by the authorised Hörmann partner according to the measurements. The special entrance door threshold neatly covers up the transition from the interior to the exterior. The threshold is fixed to the ground by concealed screws.

Step 3: The Hörmann fitter precisely adjusts the entrance door during the fitting, ensuring that your door will give you pleasure for a long time. This guarantees the optimal functioning of the Hörmann entrance door right from the start.

TIP: The S-5-Automatic/comfort locks have been tested and certified by the VDS (German Property Insurance Association). This means that the self-locking doors are considered locked in case of a break-in, maintaining your claims towards your property insurance.

Securing your home!

Highest protection matched with convenient operation

Always, good to know – beyond the standard security equipment of Hörmann entrance doors, you can equip your door with intelligent technology for more comfort and security. Hörmann offers you the latest options ranging from mechanical locking with the S-3 S security package or electronic locking with the S-5 Comfort package, as well as convenient access control using fingerprints. Your Hörmann partner will offer you consultation and information on this topic.

Graduated higher security

Hörmann offers you various security packages offering graduated additional security and comfort.

Secure opening with an integrated steel bar:

The **S-3 S** security package features a steel bar integrated in the lock. This allows you to initially open the door only a crack, preventing strangers from pushing it open all the way. This security package is also available with an automatic lock (**S-5 S Automatic**) which mechanically locks your entrance door when it is pulled shut. The automatic lock is also available without a steel bar (**S-5 Automatic**).

Automatic locking – convenient opening:

The **S-5 Comfort** security packages feature an automatic lock that secures the door when pulled shut. When opening via one of the control element options (internal push button, hand transmitter, etc.), an integrated motor releases the lock and the door can be easily opened. Of course you can continue to unlock your entrance door with its key.

❶ Push button opening:

With the **S-5 Comfort**, your entrance door can be opened at the push of a button from the inside, e.g. via the house intercom. This is especially suited for apartment buildings.

❷ With transponder technology:

With **S-5 Comfort Plus**, you can additionally open your door very conveniently from the outside via transponder technology, i.e. with an electronic key without having to touch the door.

❸ Via finger print:

S-5 Comfort Scan opens your door with a finger scanner. You and your family no longer need keys. Incidentally, you can also equip your Hörmann garage door with this technology.

The Vario programme

Tailored to your wishes

The Hörmann Vario programme has almost no limits, but numerous advantages. All entrance doors are available with the colours, handles and glazings shown here, as well as in versions customised to your precise specifications. Select one of 11 equally-priced preferred colours or RAL to choose, glazings with different structures or individual handles. Your specialised Hörmann dealer will provide you with prices and delivery times for your dream door.

Select one of 11 equally-priced preferred colours for a surcharge

Hörmann colour CH 703, structured

Hörmann colour CH 607, structured

RAL 9016 M Traffic white, matt

RAL 9006 White aluminium, matt

RAL 8028 Terra brown, matt

RAL 7040 Window grey, matt

RAL 7016 Anthracite grey, matt

RAL 7015 Slate grey, matt

RAL 6009 Fir green, matt

RAL 6005 Moss green, matt

RAL 3003 Ruby red, matt

Colour coating possible on both sides

All Hörmann entrance doors in standard Traffic white RAL 9016 are powder-coated on the inside and outside. Entrance doors in preferred colours are powder-coated on the outside. (Inside in Traffic white RAL 9016, high gloss as standard). On request, entrance doors can be colour-coated on both sides, even in different colours.

Colour in line with your individual wishes

Besides our 11 equally-priced preferred colours, you can also choose an entrance door in any of the RAL colours (neon and pearl-effect colours on request). Pick the colour that best fits your home!

Shades matching Hörmann's garage doors

Each entrance door also has a Hörmann garage door in a matching shade. For more information, ask your Hörmann specialist dealer.

Dark colours should be avoided if the aluminium entrance door is exposed to the sun, as a possible deformation of the leaf may impair door function and leaktightness.

A handle on everything – with a design according to your wishes

Throughout this catalogue, we have selected a matching handle from the numerous handle options for each entrance door style shown. Yet this is only a suggestion. You can select your personal favourite from our programme according to your wishes and vision, because your taste is what matters. Here is an overview of all handles at a glance. Your specialised Hörmann dealer can provide you with prices and delivery times.
