

HAND MADE GARAGE DOORS

TAILOR MADE GARAGE DOORS

to complement your home

WELCOME TO RUNDUM MEIR!

WE MAKE IT OUR BUSINESS TO MEET YOUR REQUIREMENTS. WE HAVE BEEN WORKING CREATIVELY FOR OUR CLIENTS SINCE 1968.

There's very little that is as important to the individual and the rest of the family as owning your own home.

Whether you are building your own, moving to a new, or renovating your existing house, the garage door is an integral part of the overall look and feel of your home.

We offer an extensive range of designs and materials to allow you to realise the true architectural potential of your house. Placing your garage door at the centre of demanding architecture is the foundation of our business.

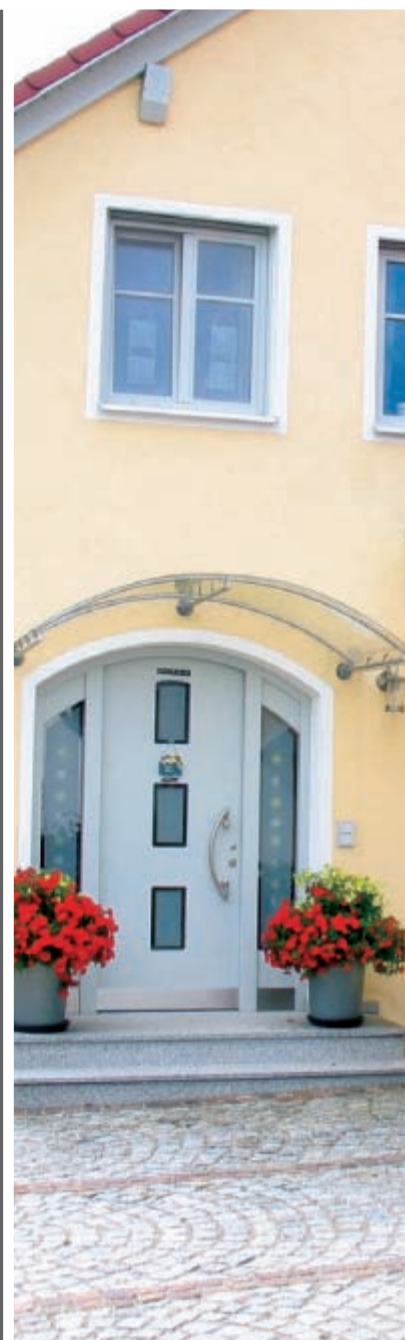

Over the years our customers have come to trust excellent technical solutions, value the high quality and reliability of our hand made garage doors.

After all, we make it our business to meet your requirements.

Our name depends on it.

RUNDUM MEIR
Quality since 1968

YOUR IDEAS ARE IN GOOD HANDS WITH US

In October 1998 the factory gained certification for outstanding environmental production methods by the Bavarian State Minister for the Environment

A new garage door – refurbishment made easy

The Rundum Meir Original round the corner door has always been one step ahead of the competition. Safe, convenient and of lasting value. The idea of combining the functions of both garage door and pedestrian entrance, coupled with maximum safety and ease of operation, is as good today as it was in 1968. The doors run smoothly, quietly and can be operated manually by children and the elderly without much fuss or danger: no springs and no possibility of doors dropping inadvertently.

Quick and reliable! Doors can be installed in a day.

SOLID TIMBER - NATURAL BEAUTY

Additional benefits are the use of the full garage width and height – indeed you can even have unrestricted use of a side wall with the installation of a partition. No tracks and door under the ceiling.

Top and side fascias can be made to match the door, thereby making Rundum Meir the ideal solution for all extremely large entrances or where there is very little headroom. This in turn can also provide easy access for tall vehicles.

OUR OFFER TO YOU:

- Competent advice
- On site survey
- Installation service
- Automation with remote control
- After sales service

ORIGINAL AROUND THE CORNER DOORS OF SOLID TIMBER

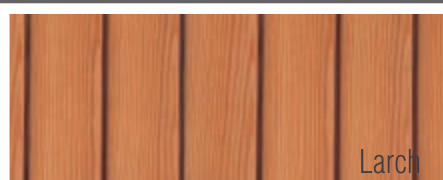

Norwegian Spruce

Superior Spruce

Hemlock

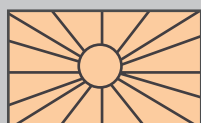

Larch

Other timbers such as oak and Sapele on request

Our garage doors are impregnated with an environmentally-compatible base stain and are sealed at the bottom to prevent water absorption. We can base coat the doors for you but leave the final finish to you so you can have it exactly as you want. Wood is a natural product so it should be given a final coating with either suitable paint or a commercial, thin-layer, micro-porous stain system within 2 weeks of installation.

Differing methods of application and reaction to light as well as other environmental influences can alter colours. Dark coats of paint should be avoided as continued exposure to direct sunlight can often lead to cracks appearing. Colour grain differences are a feature of real wood.

Side-Fascia

PARTIAL OPENING

The unique sliding design means that the doors can be opened to any width. This gives you a unique door-within-a-door system.

SAFETY

The special construction of the Original-Around-The-Corner means added safety. There are no cables nor torsion springs that could break.

SMOOTHNESS

Even large-size doors can be opened easily by children and the elderly, opening a door is no longer dependent on physique. Ball-bearing mounted guide-rollers make the opening of the door extremely quiet.

APPLICATIONS

New build, conversions, renovations – available for all conceivable door types and openings.

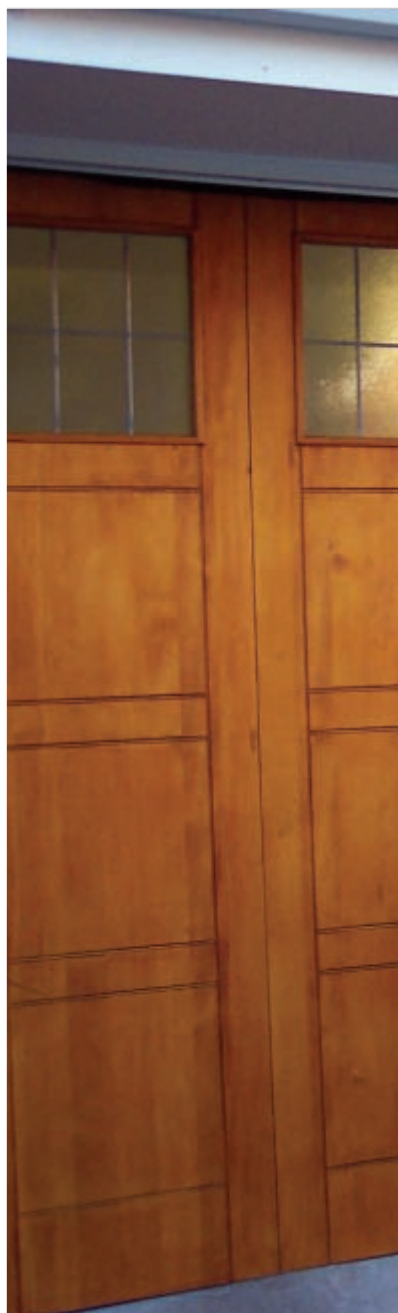

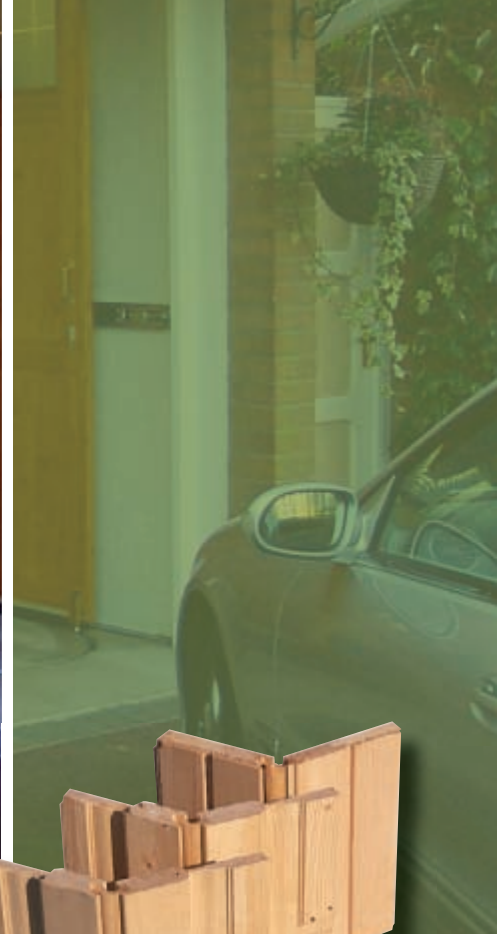

GARAGE DOOR DESIGN AT ITS MOST ATTRACTIVE

Rundum Meir side sectional doors give your home that something extra in terms of appearance. The individual design starts at the planning stage. The expertise of our craftsmen gives free rein to your wishes, enabling your home and garage to merge into one. You can always count on the quality and professional expertise of Rundum Meir. No ifs....no buts.

OVERHEAD SECTIONAL DOORS MADE OF SOLID TIMBER

THE BEAUTY OF NATURAL TIMBER

Rundum Meir ceiling mounted sectional doors made of timber make a striking impression with their fresh and vibrant appearance. Environmental concern can be combined with individual taste in garage door design. Indeed, the natural character of wood means that there are no limits to what can be done in terms of design and appearance.

MADE FROM SOLID TIMBER

Your garage door will be tailor made to suit your requirements with the finest of craftsmanship. Each timber door is factory treated with an environmentally-compatible stain to protect the wood from fungal attack. A large choice of woods and design options means that no two doors are alike.

OVERHEAD SECTIONAL DOORS IN SOLID TIMBER

THE BEAUTY OF NATURAL TIMBER

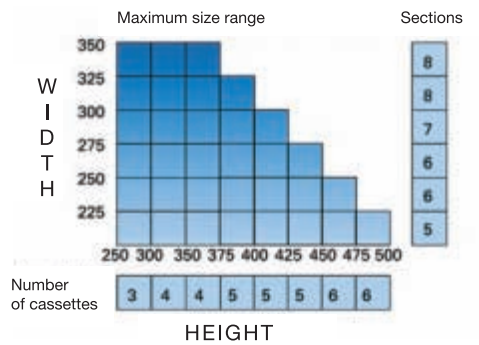

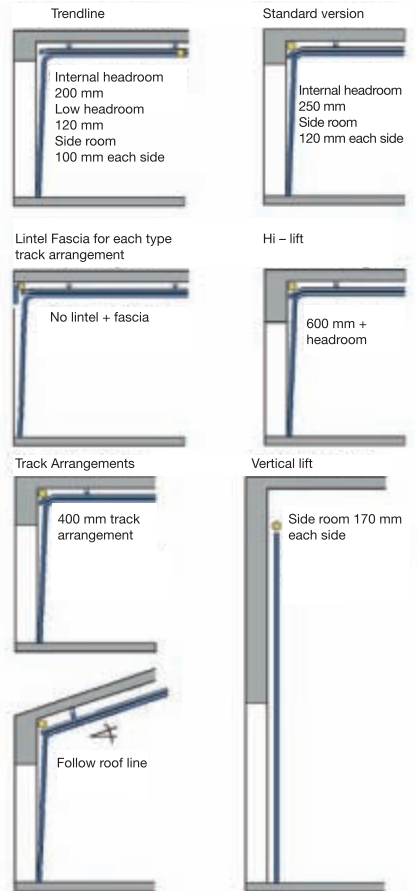

These bespoke garage doors are made from nordic spruce, superior spruce, larch, hemlock, oak and sapele. We combine high quality workmanship with bespoke routing designs or custom boarding.

RUNDUM MEIR SPECIALIST OPERATORS

small handset

DOOR MOUNTED MZ4 OPERATOR

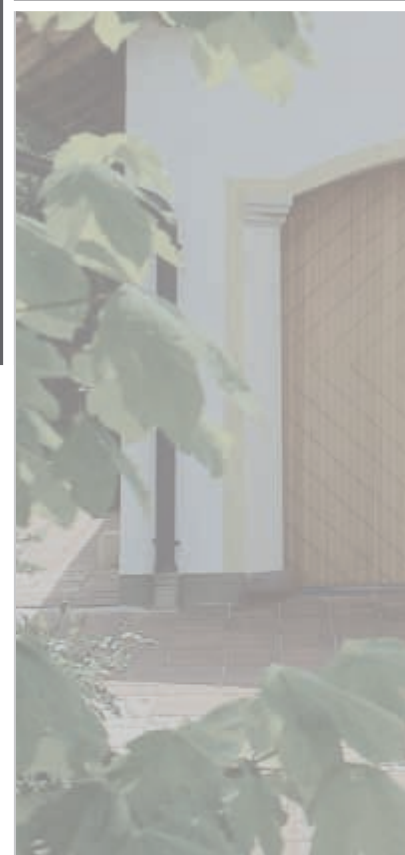

This specialised MZ4 door mounted operator for Rundum Original doors uses modern 4-channel remote control handsets. It can be Homelink compatible including a separate push button on the inside of the door and a key activated lock. A high-performance maintenance-free electronic motor with auto reverse facility on obstructions runs smoothly and quietly from every door position. A partial opening facility can be programmed so as to achieve a pedestrian door within the door.

MZ 700

KEY FEATURES

- Auto reverse safety feature
- Contact free limit switches
- TÜV – tested electronics
- Soft start and stop
- Courtesy light
- Very quiet operation
- Elegant aluminium boom on MZ 700 / 1000

whatever the weather: safe, dry and comfortable with remote control

MZ 1000

GARAGE DOOR BELT DRIVE OPERATOR

TESTED QUALITY AND SAFETY FOR ALL DOOR TYPES

SAFETY

The operators have been developed in accordance with the latest Euro standards 13241 – 1, 12453 and 12445. relating to dynamic and static forces at the leading edge and sides.

FULL AUTOMATIC POWER CONTROL

A micro-processor constantly plots and establishes the power required. If the weight of the door changes, the operator automatically adjusts the force required to maintain the correct movement of the door.

RETURN MOVEMENT SECURITY

Should an unauthorised attempt be made at opening the garage door, the operator activates and creates a counter force.

USER – FRIENDLY

The operator has been specifically designed to provide outstanding operating convenience and safety.

Soft start and soft stop at every door position for a smooth and quiet operation.

Power saving function – stand by mode requires only 1 Watt.

868 MHz frequency with 4 channel handset as standard.

MZ 3-COMPACT

Designed for single garages with a maximum height of 2250 mm
