MOTION BY

somfy®

Safe, secure and built to last!

Let your Somfy Dexxo garage door operator do the work for you.

Comfort & convenience at your fingertips

It's the end of a hard day at work. It's dark, raining and you don't want to get out of the car to open your garage door...

With a Dexxo garage door operator, you can automatically open and close your garage door at the press of a button. Don't forget the integral courtesy light that will illuminate your garage as soon as you operate your door.

Guaranteed peace of mind

We use our garages more and more in a variety of different ways – to park our vehicles, use them as workshops, store our possessions... That's why safety is a prime concern when choosing to automate your garage door. Whether it's the kids playing in the drive or a garden tool left under the door, your garage door operator must ensure that the movement of the door is completely safe.

Dexxo from Somfy is safe*. The intelligent safety system continually monitors the door travel movement and stops if an obstacle is detected.

Tested for 90,000 cycles

The Dexxo garage door operator has been built to last – our test results prove it!

Stylish looks and great control features mean nothing without the quality to back it up. That's why our Dexxo operators have been tested for 90,000 cycles – that's the equivalent of 50 operations a day for 5 years! Our confidence in the Dexxo build quality is reinforced with a 5 year warranty for total peace of mind.

* The Dexxo garage door operator conforms to all European safety standards.

Garage door automation

The advantages of garage door automation with Dexxo

A click on the remote control and your garage door opens in seconds: It's quick, easy and Somfy's RTS rolling code radio technology ensures that it is also very secure.

Your automatic door is now more secure. Dexxo reacts to any attempt at trying to force the door open and exerts counter force to resist the potential break-in.

The intelligent obstacle detection system ensures that the door will immediately stop once an obstacle is detected during door travel.

Power cut! Use the manual release system to operate your door manually or choose the battery back-up pack for continued automatic operation.

What type of garage door is suitable for automation?

Dexxo is compatible with the majority of garage door types, however certain doors will require additional mechanical adapters to make automation possible. Providing your door is in good condition, is well balanced and operates smoothly through it's open and close cycle, it should be suitable for automation*.

Canopy door

Retractable door

Sectional door

Side opening door

Side hinged door

* Your local Somfy garage door specialist may be required to inspect your garage door to confirm whether it is suitable for automation.

Dexxo you decide...

Your automatic garage door can be controlled using a wall mounted switch, or, better still, using a pocket sized keyring remote control – the choice is yours.

Keyring remote control

Keygo 4 RTS

4 channel remote control to pair with your keys and slip in your pocket.

Keyfob remote control

Keytis 2 RTS

2 channel compact remote control.

Keyfob remote control

Keytis 4 RTS

4 channel remote control with lock function to prevent unauthorised use.

Wall switch control

Radio wall switch RTS

Battery powered 2 channel wall switch.

Secure access control

Radio keypad RTS

Battery powered 2 channel keypad access control unit.

Additional safety device

Photobeam set

Sends a beam across the path of the garage opening to detect obstacles.

Emergency power

Battery back-up pack

The battery back-up pack simply plugs into the control unit of the Dexxo and once fully charged will provide up to 10 garage door operations over a 24hr period following a power cut.

Wall switch control

Situ RTS Pure

Battery powered single channel wall switch in white gloss finish.

Remote control

Telis 1 RTS Lounge

Single channel remote control in black gloss finish.

Lighting control

Lighting receiver RTS

Radio receiver to control lighting with power rating up to 500W.

Auxiliary control

Standard receiver RTS

Radio receiver providing a signal to control an existing automation application e.g. electric gates.

Why choose Dexxo?

A quality product from a quality company.

Somfy is a global company present in 51 countries, via a network of 52 subsidiaries and 26 offices on all five continents. Our growth and success has been achieved by delivering high quality products that are easy to use and last for a long time. We pride ourselves on offering unrivalled service and support to both our professional partners and users of our products.

We test the endurance of our motors under the harshest climatic conditions. Before being installed in your home, each Somfy motor is inspected in the factory, so that you can benefit from a long-term guarantee. Our motors, and all Somfy's products, naturally comply with safety standards.

Not all garage door operators are the same, nor are they complemented with the impressive controls and accessory range Dexxo has to offer. Take the battery back-up pack as an example, no other garage door operator offers this type of accessory. From keyring remote to battery powered keypad access control units – Somfy have the solution.
