

## AUTOMATION

### Automatic Door Openers

All Wessex garage doors are ready for the installation of a Wessex electric opener thereby providing the major benefits of convenience, security and effortless operation.

Wessex canopy doors up to 2438mm wide x 2134mm high (8'0" x 7'0") can be fitted with the Autoglide dedicated canopy door opener\*. Autoglide is the only garage door opener specifically designed to operate safely and effectively on canopy doors.

Wessex retractable doors and Vienna sectional doors can be fitted with one of our "state of the art" DC operators. The DC-650NIII super quiet toothed cable drive operator is suitable for most door sizes, alternatively the more powerful DC-800NIII is available for our larger doors. Both incorporate the latest microchip technology, LED status and diagnostics, very simple 3-step set-up procedure plus a comprehensive list of safety and security features. Traditional chain drive or the "whisper quiet" Kevlar belt drive options are available which is particularly suited to integral garages.

Our entry level opener, the DC-550NIII is equipped with all the safety features of the DC-650/800NIII operators and is suitable for smaller door sizes.

To complement the standard electric opener packages Wessex also offer a dedicated range of options and accessories to add extra convenience and extra security to satisfy your individual requirements. Once you have installed an opener you'll never want to be without one.

#### Autoglide

This very safe and secure DC operator is purpose built for use with overhead (canopy) doors and features the ultra secure Wessex Smart Entry System. There is no need for bow-arm conversion and the door's latching system is retained for extra security. Autoglide is suitable for overhead (canopy) doors up to 2438mm wide by 2134mm high (8'0" x 7'0") on Safelift gear.

\*Note: If the Autoglide system is fitted to a G.R.P. overhead (canopy) garage door, an alternative spindle is required.

#### DC-650NIII

Smooth DC motor featuring 'soft start-soft stop' for improved safety and quieter closing. Also features Smart Entry System automated force setting. Patented Reference Point Technology means the opener always knows the precise position of the door and constantly measures and monitors forces for ultimate safety and sensitivity. The operator not only monitors itself, the Doorsafe monitoring feature constantly measures the door's performance and activates the safety systems should the door begin to operate outside the force safety envelope. Energy saving circuitry reduces running costs. Anti-thief backdrive feature gives further protection against unauthorised entry. The DC-650NIII operator is suitable for Wessex 3 and 4 Crown doors and Vienna sectional doors up to 4267mm wide x 2286mm high (14'0" x 7'6") or 3658mm wide x 2438mm high (12'0" x 8'0") and 5 Crown doors up to 3048mm wide x 2134mm high (10'0" x 7'0").

The new toothed cable drive is exceptionally quiet.

#### DC-800NIII

The DC800-NIII shares all the features of the DC650-NIII but has a more powerful motor. It also allows an intermediate close position to be programmed and an adjustable interval for the courtesy light. This operator is suitable for all retractable doors but is recommended for Wessex 3 and 4 Crown doors and Vienna sectional doors over 4267mm wide x 2134mm high (14'0" x 7'0") or 3658mm wide x 2438mm high (12'0" x 8'0") and all 5 Crown doors.

#### DC-550NIII

The DC550-NIII is our entry level operator. This operator is suitable for Wessex 3 and 4 Crown and Vienna sectional doors up to 4267mm wide x 2134mm high (14'0" x 7'0")
