

Enter into excellence.

NEW MODELS ARA TAU ZEN

SILVELOX

**The excellent
Door.**

Silvelox from more than 40 years is synonymous of security and beauty, two pintles around which its prestigious garage doors and entrance doors rotate.

A recent specialisation that, given the experience, has enabled Silvelox to broaden its offer and to position itself at the top also between the companies producing entrance doors.

The objective of Silvelox is to propose continuously new solutions that satisfy the aesthetic and functional needs of the market and enable everybody to personalise in a unique and exclusive way their home.

The recent three new models of the line Style, designed by important architects, blend perfectly with the Silvelox approach: a perfect combination of lines and shapes to obtain a researched aesthetic effect, elegant, linear and balanced. All Silvelox novelties respond to classic and modern needs and are always supported by consolidated artisan traditions that become concrete in the choice of models and the possibility to personalise each small detail: from glass to wood, from windows to handles, from colours to applications.

z e n

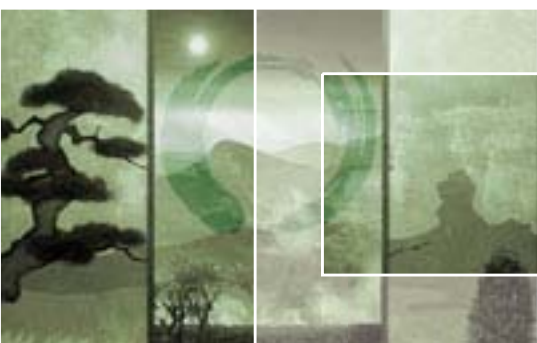

The carving of the panel reproduces the distinctive and characteristic elements of the ARA Pacis Augustea in Rome. One of the most high expressions of the era Augustea and symbol of the return of an era of renascence and prosperity.

The idea comes from the drawing of the panel that reproduces with the carving the letter T. The name of the model comes from the Greek alphabet, from the nineteenth letter of the alphabet that is Tau (T; t). From the ancient times this sign was seen as miraculous preserving from illnesses and often was painted on the doors against pest.

The drawing of the carving reminds the symbol Zen that is not reasoning, theory, but experience objective and subjective that recalls the human being to embrace contradictions, to make a synthesis and realise balance.

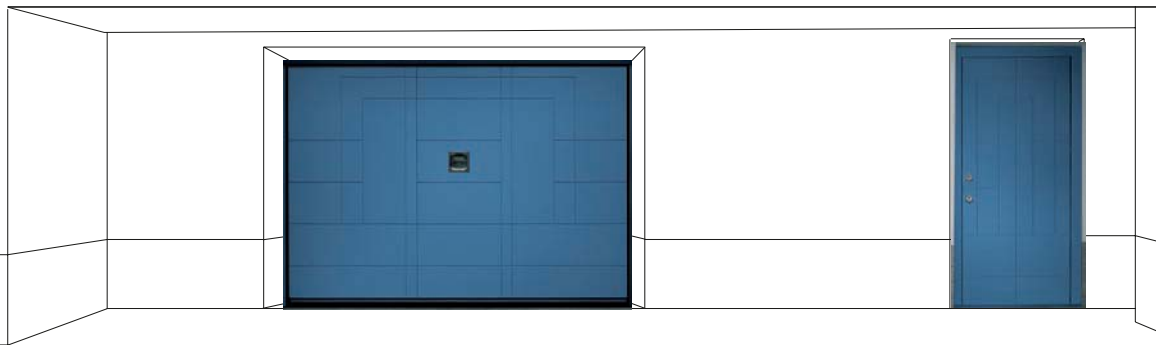

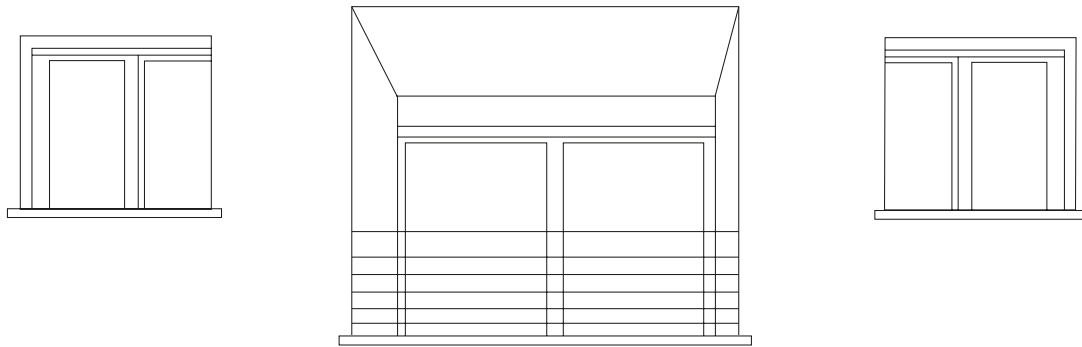

Personalised (glasses, windows, woods, colours, inserts, handles....) please refer to the entire range of Silvelox doors and accessories on the Silvelox catalogue.

Harmonic combination of geometric shapes that compose a design. Particularly adapt in modern contexts, suitable for window insertions.

the woods

The essences used are a strength of the product: a wide choice combining the properties of the wood with the decorative aspect of the door, satisfying personal taste and adding value to different architectural styles. All the above bearing in mind elegance and exclusivity. Ranging from Okoume to Northern spruce, to Oak; as well as, on request, valuable essences such as Meranti, Douglas, Spruce, Larch, Chestnut and Teak.

Silvelox: master's materials.

Lacquers (only on Okoume wood) On request, all similar RAL colours

the colours

Silvelox offers finishes for the wood essences chosen, using a special water-soluble acrylic varnish that guarantees stability of the characteristics of wood. Finishes that not only enhance the aesthetics, but, equally important, offer long product life. Two types of treatment: impregnations with transparent varnish, and covering lacquers (only for Okoume wood). On request, all similar RAL colours are available.

All woods come from areas of controlled deforestation in full respect of nature.
