◀ **Style TR01** in Jet Black with lever/lever handle, knocker and letterplate in Chrome

There's no place like home

After a hard day at work there is nothing better than coming home to a relaxing environment and enjoying your home comforts. To be able to enjoy time with your loved ones, you have to feel safe and at ease in your own four walls, it all begins with your entrance door.

For a style to suit your taste and the security to put you at ease, Hörmann ThermoComp entrance doors will provide you with that and more.

GOOD REASONS TO TRY HÖRMANN

“A good reputation must be earned.”

August Hörmann

In keeping with the tradition started by the company's founder, the name Hörmann delivers brand name quality with extensive product expertise. The family business has over 80 years of experience as a construction component specialist and sees itself as your partner from the very beginning of building and renovation projects. It's no surprise that Hörmann is one of Europe's most successful door providers. This makes a Hörmann door a reassuring purchase.

1 Quality products from Great Britain

All doors are developed and manufactured by Hörmann. Our highly qualified employees work intensively on new products, continual further developments and improvements to details. Patents and unique products on the market are the result of this. Endurance tests under real conditions ensure mature series products with Hörmann quality.

2 Doors for generations

We are convinced of our products and our uncompromising quality assurance. That is why you will enjoy a Hörmann door in your house for many years.

3 An eye on the future

Hörmann is setting a good example. This is why the company has obtained over 70 % of its required energy from green sources and will continue to increase this percentage. At the same time, many tonnes of CO² are saved each year thanks to the introduction of an intelligent and certified energy management system. And last but not least, Hörmann offers products for sustainable construction. Find out more about Hörmann's environmental activities in the "We Think Green" brochure.

GOOD REASONS TO TRY HÖRMANN

4 Security as standard

Our doors are fitted with high security multi-point locking systems as standard. These locks meet the requirements of PAS 23/24 and are tested in accordance with BS EN ISO 9001 Quality Assurance. We also supply a 'split spindle' option which further enhances security.

The door locks on the latch as soon as the door is shut and requires a key to unlock it.

To take the security of our doors to an even higher level, we also fit our specially designed triple dogbolt system as standard. This involves two sets of triple hinge bolts that secure the door to the frame, protecting you against intruders.

5 Glazings

Making these doors even more special is the fact that each decorative glass panel has been hand crafted with bevels to complement the door.

6 Individual designs

Design your door exactly the way you want it, to your own individual taste. You can choose between various colours and decors as well as glazings. Discover the design possibilities from page 34.

THERMOCOMP

Traditional range

Whether you live on a Victorian terrace or a modern development, your home is as individual as you are and deserves a facade that makes a unique statement. By choosing a modern, composite door you can benefit from a wide variety of styles, sizes, colours, glazing and fixtures.

Exploring the available options gives you fresh ideas and ensures that you arrive at a front door that is highly personalised and a complete reflection of your tastes.

THERMOCOMP

Cottage Range

Character properties are perennially popular among home buyers who are looking for a piece of history. These period houses usually offer several original features which their owners seek to preserve. Even when looking to renovate or improve these homes, attention to detail is key, so modern fixtures with heritage overtones are the ideal solution.

THERMOCOMP

Contemporary Range

There has been a significant number of new homes built over the last 50 years. Often, these more modern houses need doors and windows that are in keeping with the surrounding architecture. There are an increasing number of exciting, contemporary doors and other fixtures available to homeowners looking to give their post-war house a clean, fresh look.

These ultra new door styles provide instant sophistication to a home.

SAFETY EQUIPMENT

Security as standard

Our doors are fitted with high security multi-point locking systems as standard. These locks meet the requirements of PAS 23/24 and are tested in accordance with BS EN ISO 9001 Quality Assurance. We also supply a 'split spindle' option which further enhances security. The door locks on the latch as soon as the door is shut and requires a key to unlock it.

To take the security of our doors to an even higher level, we also fit our specially designed triple dogbolt system as standard. This involves two sets of triple hinge bolts that secure the door to the frame, protecting you against intruders. Through our design we aim to make fitting composite doors easier.

Viewed from outside

Standard range

1 Triple Dogbolts

- 2 sets of triple dogbolts supplied as standard on all Hörmann composite doors
- Designed to complement our existing high security multi-point lock
- Exclusive to Hörmann

2 Euro cylinder

Delivered with 3 keys as standard. With emergency and hazard function, i.e. the door lock can still be operated when the key is inserted on the inside.

Specialised range

3 AV2 Multipoint Autolock

Designed to provide homeowners with instant security by automatically engaging two solid high-tensile steel hooks and central latch every time the door is shut.

Standard 24 mm wide keeps with dust boxes, auto latch strike plate and off-set screw fixing for enhanced security.

4 Thunderbolt Heritage Lock

Designed to complement our traditional or modern doors featuring shoulder height locking.

5 Security cylinder

The security door cylinder incorporates an anti-snap facility to protect your door and keep your home secured.

6 Thumb-turn cylinder

The standard and security cylinders are available with an optional thumb-turn. The door can be locked and unlocked from the inside without the use of a key.

THERMOCOMP

Fire Door range

Hörmann Fire Doors are tested by independent fire laboratories and are available with a range of ironmongery options. Our Fire Doors have been tested to meet the requirements for a 30 minute fire resistance (FD30S) as required for flat entrance doors and most other fire door situations.

Hörmann Fire Doors are available in a range of PVCu or softwood frames as pre-hung units complete with intumescent fire seals, smoke seals and sound seals to meet Approved Documents B&E of the Building Regulations.

- Glazed options available

Ironmongery

- Multipoint locking system
- Euro profile key/thumb-turn cylinder
- Steel butt hinges as standard

Additional Items

- 180° eye viewer
- Fire rated letterplate
- Door chain

Self-Closing Options

- Concealed door closer.
- Overhead door closer.

Overhead Closer detail timber frame

Overhead Closer detail PVCu frame

Minimum frame head depth required for fitting of overhead closer.

1 Fire resistant glazing

Fire resistant glass is available as a double glazed unit with the inside pane laminated and the external pane in Pilkington Pyroshield2 Georgian wire glass (rating E30). Where obscure glass is required then the laminated panel is supplied as stippolyte obscure.

2 Self closing devices

Fire doors are usually required to have self closing devices fitted. Hörmann recommends the use of overhead type controlled closers to EN 1154 for this purpose. The closers used are rated for the weight and size of the doors supplied. Jamb type concealed closers can be supplied on request but Hörmann accepts no responsibility for the ability of this type of device to fully close a door. The ability of any closer to close a door is dependent on the free movement of air on both the opening side and closing side of the door. Overhead closers require a minimum of 30 mm fixing space at the head of the frame and also clearance at the reveal to allow the door to open to 90°. Please ensure your build detail allows sufficient space.

3 Fire Door Frame options

- a: Single
- b: Single Toplight
- c: Single Midrail Sidelight

4 Fire Rated letterplate
