Terms & Conditions

All products are sold subject to Cardale Doors Limited and Wessex Garage Doors limited Standard Conditions of Sale, which are available upon request.

Specification

In order to ensure continual product improvement, the Company reserves the right to make any alterations in design or manufacture without notification.

Warranty

Spares and accessories are guaranteed for 12 months from the date of purchase. This guarantee is limited to the free replacement of faulty goods only.

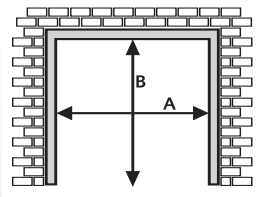

Returned goods

Spares and accessories may be returned for credit if they are returned carriage paid in a re-saleable condition within 3 days from customer receipt. Credit will not be given for post/carriage and a restocking charge of 25% of purchase price will apply.

Before using this list to locate the part you require, you will need to know the following:

- 1) The model name of your Cardale/Wessex garage door.
- 2) The size of your Cardale/Wessex garage door.
- 3) The type of lifting gear fitted to your Cardale/Wessex garage door.

All sizes quoted refer to the size of the door opening and not the door itself.

Sizes are always quoted as width x height (A x B) – see diagram left.

In most cases single sized doors are less than 8'0" wide.

Doors wider than 8' 1" will normally require spares for double doors.

Canopy/Trackless Gear

- Mk. 2 and Mk. 3 doors use a spring drum assembly mounted at the top of the door.
- Compact doors use a coil spring which runs across the centre of the door.
- Overhead trackless doors use a coil spring mounted along the top of the door.
- All these doors are referred to as Trackless (T/L) or Canopy doors. **SafeLift Canopy/Overhead Trackless is our current standard T/L lifting gear.** When ordering right or left handed spares (RH or LH) you should view the door from **inside** the garage.

Retractable/Slideaway Gear

Doors with Retractable / Slideaway (S/A) lifting gear retract back into the garage when open. See diagram left. All double doors use Retractable / Slideaway gear.
