MADE TO MEASURE PRICING

Sizing: Sizes shown for garage doors refer to inner frame dimensions. To measure for a garage door, use the inner frame dimension - do not measure the existing door. Corinthian and Minster doors under 2080mm wide have three panels, not four (see Doric and Victoria). The tables detail the pricing structure for made to measure garage doors. Any size of garage door falling within each band is priced at the upper limit of the band. e.g. for an unframed, tracked Corinthian garage door measuring 7'2" wide x 6'9" high (2184mm x 2057mm) use width band 7'6" (2286mm) and height band 7'0" (2134mm) = **Price £1002**

OPTIONS AVAILABLE - PAINTED STEEL DOORS

W FULLY FINISHED DEEP TEXTURED WHITE

- For single doors Add **£59**
- For double doors Add **£90**

Note: This door finish does NOT require overpainting.

MADE TO MEASURE PRICING

Sizing: Sizes shown for garage doors refer to inner frame dimensions. To measure for a garage door, use the inner frame dimension - do not measure the existing door. Corinthian and Minster doors under 2080mm wide have three panels, not four (see Doric II). The tables detail the pricing structure for made to measure garage doors. Any size of garage door falling within each band is priced at the upper limit of the band. e.g. for an unframed, tracked Doric II garage door measuring 7'2" wide x 6'9" high (2184mm x 2057mm) using width band 7'6" (2286mm) and height band 7'0" (2134mm) = **Price £1067**

OPTIONS AVAILABLE - PLASTISOL AND LAMINATE STEEL DOORS

LIFTING GEAR FOR USE WITH HANDMADE TIMBER DOORS

DOOR BRACE AND LOCK PACKS

Lifting gear for use with your own created timber garage door. Add Ultra gear to your timber panel to create an up and over garage door. The kit has side springs and horizontal tracks to carry the door into the garage. The set number denotes the maximum door weight in lbs the kit is suitable for. For example, a U150 kit can be used with a door panel weighing up to 150lbs. Door braces and locks are ordered separately.

Set No.	Door height minimum - maximum	Price
U100 (short)	1880 (6'2") 1981 (6'6")	£173.25
U100	1981 (6'6") 2134 (7'0")	£173.25
U150	1981 (6'6") 2134 (7'0")	£207.90
U200	1981 (6'6") 2134 (7'0")	£270.27
U250	2057 (6'9") 2286 (7'6")	£337.84

Part No: 034313
Door brace U150/200 £9.53
 (Single length 5'6")

Part No: 034337
Door brace DB250 £12.72
 (Single length 7'6". Recommended to order in pairs)

Part No: 033974
Lock arm £4.77
 5'0³/₄" long

Part No: 033998
Lock arm £10.32
 8'0¹/₂" long

Part No: 086158
ELB Lock pack complete £38.13

Lock pack complete with fixings for use with Ultra lifting gear. This is for use with your own manufactured doors fitted with Henderson Ultra lifting gear

MADE TO MEASURE PRICING

Sizing: Sizes shown for garage doors refer to inner frame dimensions. To measure for a garage door, use the inner frame dimension - do not measure the existing door. The tables detail the pricing structure for made to measure garage doors. Any size of garage door falling within each band is priced at the upper limit of the band. e.g. For an unframed, tracked Caversham garage door measuring 7'2" wide x 6'9" high (2184mm x 2057mm) use width band 7'6" (2286mm) and height band 7'0" (2134mm) = **Price £1604**

OPTIONS AVAILABLE - GRP GARAGE DOORS

F FRAMED DOORS

From Feb 1st frames supplied in White, Black or Brown powder coat painted finish.

- For single doors Add **£95**
- For double doors Add **£170**

Choose either: Standard width frame (68mm jamb) or Narrow width frame (canopy gear only, 54mm jamb)

Until Feb 1st frames supplied in primed finish.

- For single doors 54/68mm Add **£95/£110**
- For double doors Add **£190**

Until Feb 1st frames supplied in White, Black or Brown Plastisol finish.

- For single doors 54/68mm Add **£110/£125**
- For double doors Add **£205**

Until Feb 1st frames supplied in a Golden Oak and Rosewood woodgrain finish.

- For single doors 54/68mm Add **£120/£135**
- For double doors Add **£215**

Although sharing the same name, Rosewood Glasswood GRP doors and Rosewood Weathergrain steel frames are not a match for colour. Dark Mahogany is the closest in colour - always ask to see a sample if you are unsure.

Note: Single doors are sizes up to and including 8ft (2438mm) wide. Doors over this size are classed as double doors.

ORDERING NOTES

Ordering Notes: Henderson Roller Doors are designed to fit behind the brickwork opening to give a clear drive through width*. To order, state the curtain size, ensuring that the curtain width is greater than the opening by: 'A' series: 50 mm (2") minimum, 'AA' series: 100mm (4") minimum. For example, to order a door for a brickwork opening width of 7'0", order an 'A' series door with curtain width minimum of 7'2".

Made to Measure Sizes: Any size door can be supplied. Any size of garage door falling within each band is priced at the upper limit of the band **with a £40 supplement added.**

Packaging: Henderson Roller Doors are factory 'bubble wrapped' as standard for increased protection during transit.

* The drive through height is 80mm less than the nominal opening height.

BOW ARM CONVERTER SYSTEM

If your door has canopy lifting gear, you will require a Bow Arm Converter System to enable a manual door to be used with a remote control operator.

The Bow Arm Converter is suitable for use with single size doors up to a maximum size of 2743mm (9ft) wide. The Bow Arm Converter system cannot be used when the operator boom is mounted further than 3 inches from the back face of the garage door. Use of a Bow Arm will reduce the drive through height of the garage by approximately 6"

TECHNICAL

CANOPY GEAR

STANDARD DOOR AND BRICKWORK APERTURE SIZES

- It is recommended that Locklift Canopy is fitted to a weatherbeaded 70mm x 70mm timber "goalpost" frame, although the door can be fitted to a smaller side jamb down to a minimum of 45 mm wide. This frame is not supplied. A Henderson garage doors Quick-fit steel frame can also be used. Locklift Canopy steel framed dimensions are 54 mm wide on side section, 68 mm high on top section and 35 mm deep all round, plus there is also an option of a 68mm wide side jamb.
- The minimum headroom required above the lower face of the top timber or lintel is 65 mm.

NOTES

Door sizes given represent opening sizes within the frame. Door leaves are approximately 19 mm narrower and 25 mm shorter to allow for operating clearances and tolerances. 'Within the brickwork' aperture dimensions include a 3 mm gap between the frame and brickwork on all three sides to allow for coursing and tolerances. 'Behind the brickwork' aperture dimensions allow the frame to overlap into the aperture by a minimum of 13 mm on both sides to allow for coursing and tolerances.

FITTING FRAMES TO THE BRICKWORK

Frames may be fitted within or behind the brickwork. Fitting behind the brickwork, if the garage length allows, will increase the drive-through width by up to 114 mm (4 1/2").

A 19 mm x 19 mm weatherbead should always be fitted to the under-side of the door frame lintel in front of the door to hide the top gap. This feature is integral on the Henderson garage doors Quick-fit steel frame.

Canopy doors are quick and easy to install and take up less space in the garage when opening.

Canopy lifting gear is available for single sized doors up to 2438 mm (8'0") wide and 2134 mm (7'0") high only.

RETRACTABLE GEAR

STANDARD DOOR AND BRICKWORK APERTURE SIZES

- Henderson garage doors Locklift Retractable door gear should be fitted to a weatherbeaded 70 mm x 70 mm standard timber 'goalpost' frame (not supplied). Alternatively retractable single and double doors up to 4876 mm may be fitted to a Henderson garage doors Quick-fit steel retractable frame (single door dimensions = 68 mm wide by 60mm deep all round, double door dimensions = 68 mm wide x 75 mm deep all round).
- The minimum headroom required above the lower face of the top timber or lintel is 43mm for double doors, 38.5 mm for single doors.

NOTES

- Door sizes given are for opening sizes within the frame. Door leaves are approximately 19 mm narrower and 25 mm shorter than the dimensions given to allow for clearances and tolerances.
- In use, single and double retractable lifting gear reduces drive through width by 114mm (4 1/2") and height by 127 mm (5").
- 'Within the brickwork' aperture dimensions include a 3 mm gap between the frame and brickwork on all three sides to allow for coursing and tolerances.
- 'Behind the brickwork' aperture dimensions allow the frame to overlap into the aperture by 13 mm on both sides to allow for coursing and tolerances.
- Retractable frames for single and double doors are also available 7'6" high for single doors and 8'0" high for double doors.
- Special size frames are available in any size from 6'6" x 6'1" to 16' 0" x 8'0".

TECHNICAL

INSULATED ROLLER DOORS

FITTING WITHIN THE APERTURE (Between walls or between reveal)

NOTES

For this type of installation we strongly recommend that a half box or full box is fitted, this will cover and protect the axle assembly and give added security.

FIXING OPTIONS - Within the aperture

FITTING BEHIND THE APERTURE

With headroom **GREATER** than
Insulated 77 = 270/300mm or for Insulated 55 205mm

With headroom **LESS** than
Insulated 77 = 270/300mm or for Insulated 55 205mm

FIXING OPTIONS - Behind the aperture

SIDE CLEARANCE

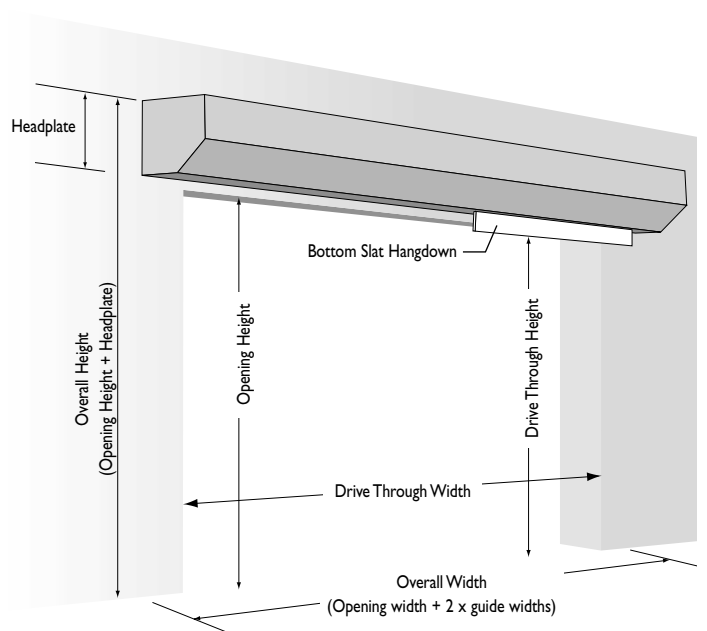

Insulated 77: 70mm or 95mm is required only if the guides are to be fully concealed. (70mm for door sizes up to 9sqm, 95mm for door sizes over 9sqm and guide heights above 2500mm and 66mm for all Insulated 55 doors). A minimum of 40mm is required to give sufficient room for fixing but a portion of the guide tracks will be visible.

HEADROOM

Insulated 77: 270mm for door sizes up to 9sqm 300mm for door sizes over 9sqm, over 2500mm guide height & any doors with a roll box option selected
Insulated 55: 205mm for all doors

NOTES:

- Doors can be installed either within the garage opening or behind the garage opening (see illustrations above).
- If fitting the door drum within the garage opening, a full box must be used to cover the drum and the motor.
- When ordering a door, please use the dedicated order form and current price list.

TECHNICAL

ROLLER DOORS

STANDARD DOOR AND BRICKWORK APERTURE SIZES

- Steel roller doors are specified by curtain size and made to measure in 5 mm (3/16") increments from 900mm (3'0") wide x 1200 mm (4'0") high to 5100 mm (16' 9") wide x 3050 mm (10' 0") high.
- Widths up to 3404 mm (11' 2") are classed as 'A' series. Widths above this are classed as 'AA' series.
- When correctly installed the door curtain should overlap the opening width on both sides by a minimum of:
 - 25 mm each side for 'A' series doors without Rollguard
 - 50 mm each side for 'AA' series doors without Rollguard
 - 35 mm each side for all doors supplied with Rollguard

HEADROOM

The minimum clearance between the bottom of the lintel and the ceiling will vary according to the door height required, as illustrated below.

NOTES

- The clearance must extend back into the garage by 500 mm for all door heights.
- The stated headroom is only necessary if the door roll is to be hidden from outside view. In cases of reduced headroom, the roll can be fixed lower; however there will be a corresponding reduction in drivethrough height.
- The drive-through height will be a minimum of 80 mm less than the opening height.

Minimum clearance required per side		
Door type	Manual door	Automatic door (Operator side only)
'A' Series	90mm	100mm
'AA' Series	120mm	150mm
All doors with Rollguard	150mm	150mm

Henderson roller garage doors are designed to fit behind the brickwork opening and to overlap the brickwork slightly in width. To order the size of your Henderson roller door, follow these 3 steps:

Series A = Doors to 3710mm wide
Series AA = Doors over 3760mm wide

1. Check that there is sufficient space available for the minimum headroom requirement dependent on the height of the door; please see minimum headroom requirements table below. The clearance must extend back into the garage by 500mm for all door heights.
2. The door should overlap the opening on each side by: Series A:25mm, Series AA:50mm. Therefore to specify the opening width, state the opening +50mm (Series A) or opening +100mm (Series AA). State the height from inside floor to underside of the brickwork.
3. Check the minimum sideroom required between the opening and the side wall of the garage, this will be dependent on the door type and the method of operation, please see the minimum clearance per side table to the left.

MINIMUM CLEARANCES

Aperture Width	Curtain width	
	Excluding Rollguard	Including Rollguard
1219mm (4'0")	1270mm	1290mm
1829mm (6'0")	1880mm	1900mm
2134mm (7'0")	2185mm	2205mm
2286mm (7'6")	2335mm	2355mm
2438mm (8'0")	2490mm	2510mm
2591mm (8'6")	2640mm	2660mm
2743mm (9'0")	2800mm	2820mm
3048mm (10'0")	3100mm	3120mm
3353mm (11'0")	3400mm	3420mm
3658mm (12'0")	3760mm	3730mm
4267mm (14'0")	4370mm	4340mm
5000mm (16'5")	5100mm	5070mm

These dimensions should be added to the aperture width when specifying to give the correct curtain width, as per the table above (note: curtain sizes have been rounded).

The curtain height should be specified the same as the aperture height.

TECHNICAL

SECTIONAL DOORS

g60 SECTIONAL GARAGE DOORS

The Henderson g60 sectional door can be fitted either to a good quality timber frame or direct to sound brickwork and can be fitted either within or behind the brickwork opening. If fitted within the brickwork opening, the door must be fitted to a timber frame.

To fit a g60 door behind the brickwork opening

Measure the brickwork opening width (A) and height (B). Ensure you have adequate sideroom, headroom and clear space (depth) into the garage. The space required is determined by the operating gear chosen. See the table below for details of the operating gear options.

To fit a g60 door to a timber frame within the brickwork opening

Measure the brickwork opening width (A) and height (B). Subtract the required side and headroom (as shown below) and install a timber frame to suit. For example, a door with standard tension gear will require a timber frame of minimum nominal 3"x3" (70mm x 70mm) for the frame legs and 6"x 3" (150mm x 70mm) for the frame head.

SIDEROOM/HEADROOM REQUIRED AND DEPTH OF TRAVEL INTO GARAGE					
Operating gear	Sideroom (mm)	Headroom (mm)		Depth into garage (mm)	
		Manual	Automatic	Manual*	Automatic
Tension	80	150	150	opening height (B) + 700mm	B ≤ 2250 = 3350 B ≥ 2375 = 4450
Tension (low headroom)	120	100	120	opening height (B) + 750mm	B ≤ 2250 = 3350 B ≥ 2375 = 4450
Torsion front	80	200	200	opening height (B) + 700mm	B ≤ 2250 = 3350 B ≥ 2375 = 4450
Torsion rear (low headroom)	80	100	120	opening height (B) + 800mm	B ≤ 2250 = 3350 B ≥ 2375 = 4450

* when opening height is 1900mm, add on an extra 100mm

8066	2438 x 1981 mm	2544 x 2095 mm
8070	2438 x 2134 mm	2544 x 2177 mm

- Door sizes given are for opening sizes within the frame.
- Aperture sizes include a minimum 3 mm gap between the frame and the brickwork on all three sides to allow for coursing and tolerances.

FITTING THE FRAMES TO THE BRICKWORK

Frames should be fitted within the brickwork as per the drawing shown below:

OPENING ARC OF TRAVEL

- Side hinged doors are supplied pre-framed as standard and come complete with a brass effect Euro profile night latch and deadlock, a pair of door stays, two monkey tail shoot bolts and four anti-drop anchored dog bolt hinges per door leaf.

STANDARD CONFIGURATION

- Doors are supplied to open outwards with the lock on the right when viewed from the outside. Left hand opening is available as an option.

GUARANTEES

- (a) Henderson garage doors are guaranteed against any form of manufacturing defect for a period of 2 years from the date of original purchase.
- (b) Henderson garage doors also guarantee that its garage doors will operate safely and reliably for a period of 10 years from original installation.
- (c) Henderson garage doors electric operators are guaranteed against any form of manufacturing defect for a period of 5 years for mechanical elements, motors and transformers and for a period of 2 years for other electronic and radio equipment.
- (d) The Exterior finish is guaranteed to provide an effective weatherproof membrane which will resist perforation of the substrate from the weather side due to corrosion for the periods indicated below.

2 years - Fully Finished Timber Doors, Security Shutters, Collapsible Security Gates, Security Bars and *Primed Steel Doors

1 year - *Basecoat Timber Doors

Colour change or fade to the exterior surface will be limited and uniform for a minimum period of 2 years. *(subject to finishing in accordance with terms and conditions)

Guarantees are subject to the condition as set out below;

1. During the comprehensive 2 year guarantee period BRP Group Limited companies undertake to repair or replace (at its discretion), and without charge, products or components which have suffered any form of manufacturing defect. Claims must be notified within 3 days from the date of delivery or within a reasonable time after discovery of any defect.
2. Products covered by these guarantees must have been purchased through an authorised BRP Group Limited Companies garage door supplier or as original equipment attached to a newly built dwelling.
3. The warranties shall apply for normal use only. Normal use constitutes no more than 5 operations (open/close cycles) per day.
4. The warranties offered attach to the BRP Group Limited Companies product only and no consequential damages will apply no matter how caused.
5. No liability will be accepted as a result of normal wear and tear, incorrect storage, incorrect handling, faulty installation, incorrect use or wilful damage.
6. Claims under this guarantee must be made through the original supplier and accompanied by relevant documentation indicating the date of purchase (e.g. receipt).
7. BRP Group Limited Companies maximum liability shall be the original purchase price inclusive of Value Added Tax at the rate prevailing when supplied.
8. Any product which is the subject of a claim:
 - i) must have been correctly installed in accordance with the installation instructions supplied and thereafter properly maintained by a suitably experienced engineer on a regular basis as set out in the Maintenance and Operating Instructions provided with every door. (Additional copies of these instructions are available by contacting the installer or the manufacturing company). We recommend that regular maintenance is provided by a suitably experienced engineer. See your Yellow Pages for your local BRP Group Limited Companies Garage Door specialist.
 - ii) must have the manufacturers reference number still intact (found on the barcode label on the door)
 - iii) must not have been modified in any way.
9. Claims will not be accepted where the cause is due to:
 - i) impact or mechanical damage suffered during or following installation, e.g scratches, indentations, tears, scuffs or other surface abrasion.
 - ii) damage or discolouration caused by contact with any form of caustic, abrasive or corrosive substance, fumes, bird droppings, fire, smoke, floodwater, salts, acids, or from exposure to abnormal atmospheric pollution.
10. This guarantee excludes normal wear and tear on items such as cones, cables, spindles, lock cylinders, hinges or springs.
11. Only BRP Group Limited Companies original spare parts must be used when required. The use of non-BRP Group Limited Companies parts shall invalidate this guarantee. Warranty period for replacement parts is 6 months or the balance of the original warranty period if greater.
12. The Exterior Finish Guarantee applies only to the weatherside surface and where more than 5% of the surface area of the door is affected. Surfaces must be freely exposed to washing by rainfall and kept clear of accumulated dirt and debris and given equal exposure to local environmental conditions and consistent natural lighting conditions across the face of the door. Special attention is drawn to Clause (9) (ii).

Marking may occur to either side of the a roller door or shutter curtain over time due to the rolling nature of operation. This does not affect the performance of the door and is not part of the guarantee.

13. Primed steel doors and basecoat treated timber doors must receive a suitable exterior quality finishing topcoat immediately after installation. This topcoat finish must be applied strictly in accordance with the manufacturer's instructions.
14. The guarantee period for electric operators excludes batteries, fuses and light bulbs.
15. Parts replaced free of charge become the property of BRP Group Limited Companies.
16. Attempted repairs by non-qualified individuals shall invalidate this guarantee.
17. The specific terms of this guarantee shall only apply to products purchased on or after August 2009 within the UK and Eire.
18. BRP Group Limited Companies garage doors and associated products are sold subject to the BRP Group Limited Companies Standard Terms and Conditions of Sale, copies of which are available upon request. BRP Group Limited Companies shall not be liable as a result of any representation, implied warranty or other term or condition or for any consequential loss or damage, costs, expenses or other claims whatsoever except as expressly set out in these Terms and Conditions of Sale.

General Advice

Door Cleaning. Periodically clean the door panel using warm water and a soft cloth or sponge. Allow to dry naturally. Never use detergent, abrasive, caustic or solvent based cleaners as they may damage the door surface. Bird droppings should be removed immediately as these can be particularly caustic.

Door Servicing and Maintenance. All doors should be operated and maintained in line with operating and maintenance instructions supplied with every door. Every six months visually inspect all wear items (including cables) for signs of wear. If wear is detected we recommend you contact your local BRP Group Limited Companies supplier to arrange for a replacement. Garage door springs are under extreme tension and should only be repaired or replaced by a suitably qualified engineer.

Other performance issues affecting BRP Group Limited Companies. garage doors are:

BRP Group Limited Companies G.R.P. doors are individually handcrafted products manufactured to specific customer order. Due to the nature of the product and the hand finishing processes used they may occasionally display small blemishes which do not detract from the overall appearance of the product. These are regarded as being within manufacturers tolerance when such blemishes are not visible to the naked eye when viewed from a distance of three metres. Similarly, Woodgrain effect products will, like the natural material, display colour variations across their surface and colour will vary from door to door. Ordering doors to match helps reduce the variation but will not eradicate it entirely.

Translucency of the G.R.P. door panel may vary when viewed from the inside on a bright day due to variations in laminate thickness. This does not represent a manufacturing defect and overall performance is not affected.

G.R.P. Size and Deflection - the natural curing process does not affect the ultimate product size and a tolerance of ± 6 mm on both height and width is deemed acceptable. Up and over doors in the 'open' position will display a level of vertical deflection or 'sag' across the width of the panel and up to 6mm per linear metre is within design tolerance.

BRP Group Limited Companies Timber doors are made from the finest timber obtained from managed and sustainable sources. Prior to fitting they must not be stored in direct sunlight or exposed to splashes or rain as colour fading and/or staining may result. The BRP Group Limited Companies product guarantee does not cover natural variations in colour, warping, swelling or shrinkage due to the ordinary natural processes of ageing, fading or the effects of weather or climate nor does it cover the incidence of similar degradation which could have been prevented by carrying out finishing and maintenance procedures as recommended by BRP Group Limited Companies. Doors that are not factory finished should be finished with a microporous stain, front and back, in accordance with the stain manufacturers instructions immediately after fitting.

BRP Group Limited Companies Steel doors are manufactured using high quality galvanised steel. A suitable exterior grade of paint should be applied as a finishing coat to primed doors in accordance with the paint manufacturers instructions.

Garage doors should be inspected upon delivery and viewed in natural daylight (not direct sunlight) from a standard distance of 3 metres to view their overall appearance. From this distance the door panel should appear free from visible marks or distortion, stains, blemishes, indentations or scuffs. If any marks are only visible within 3 metres they will not be considered under warranty.

These terms and conditions do not affect your statutory rights.

ORDERING NOTES

GENERAL

Sizing: Sizes shown for one-piece up and over doors refer to inner frame dimensions. To measure for a garage door, use the inner frame dimension - do not measure the existing door. Sizes shown for roller doors refer to the door curtain. Always ensure the curtain overlaps the opening by the recommended amount. Sizes for insulated roller doors refer to the over guide sizes (guide height and over guide width). Sizes shown for g60 sectional doors refer to the 'daylight opening' to the garage.

Operating gear: Henderson one-piece garage doors are available with a choice of canopy or tracked operating gear. The choice of operating gear determines the position of the door handle. On doors with canopy gear, the handle is located approximately one third down from the top edge of the door. On doors with tracked operating gear the handle is approximately one third up from the bottom edge. All tracked doors over 7'6" (2286mm) high incorporate heavy duty operating gear. If you wish to add a remote control system to your door, we recommend you order a door with tracked operating gear. We recommend that all doors over 7'6" high should use a Henderson remote control system. Be aware that in certain circumstances, the use of garage doors at either end of a garage can create a 'wind tunnel' which can place undue stress on the operating gear. It is your responsibility to ensure there is sufficient sideroom, headroom and free depth space in the garage to install the door and operate it safely.

Standard Security: All Henderson doors are fitted with two point sprung action locking as standard. Roller doors are supplied with dual locking bars. g60 sectional doors are available with security latch locking as an option. Insulated roller doors are always automated for security.

Frames: One-piece up and over garage doors are available with a metal frame. The frame supplied with Premiere Steel and Timber doors is 76mm box section steel as standard. A narrow fit 60mm box section frame is available for single sized up and over doors (up to 2743mm wide) on request. The frame supplied with GRP doors is 68mm jamb as standard. A narrow fit 54mm jamb frame for single doors is available for canopy operating gear only.

g60 Side Doors: Side doors can be supplied for opening to the left or right and to the inside or outside. Please state handing as viewed from the outside. ● Inward opening door, handle on the left (hinges on the right) = left handed. ● Outward opening door, handle on the left (hinges on the right) = right handed. All doors are supplied with a black aluminium handle and eurocylinder lock as standard. g60 side doors are available in White (RAL 9016) or in Brown (RAL 8014) or to a RAL specification. The inside of the door is always white. The panel thickness is 42mm.

ONE PIECE DOOR FINISHES

Premiere steel doors are supplied with a factory applied all over matt white primer coat to allow the homeowner to apply a finishing coat to complement the colour scheme of their home. Factory applied all over deep textured fully finished white and deep textured fully finished coloured doors are available as options. Selected door styles are also available in a fully finished Plastisol or laminated steel to the exterior surface as an option. The glazing cassettes on Warkworth and Bamburgh doors feature mock black windows. For added security, the cassettes have steel behind them and cannot be seen through.

Timber doors are supplied factory treated with a microporous water repellent sealant as standard and require finishing by the homeowner to provide complete protection and to complement the colour scheme of their home, with the exception of the Monarch door which is supplied in a Mahogany finish as standard. A factory applied Mahogany woodstain finish and a Dark Oak finish are available for the door styles indicated in the Timber door section. Please note that these finishes are hand applied and will raise the timber grain slightly when dry.

GRP doors are supplied factory fully finished in a choice of timber effect colours except the Consort, President and Solstice which are supplied in smooth gloss white.
