

Aluminiuminsulated roller doors...

The clean lines of Thermaglide are attractive in any setting. The colourful choice of finishes provide either an accent or complement to existing finishes. Thermaglide is a high performance door designed to give thermal and acoustic insulating properties much higher than the average garage door.

Features

- Remote control as standard
- Insulated aluminium lath design with vision lath option
- Vertical travel – park right up to the door
- Built-in alarm, sounds if the bottom of the door is forced up
- Auto-positive locking with anti-lift geometry locking straps
- Control unit with open/close buttons and courtesy light
- Safe edge "stop and reverse" obstruction detector
- Infra-red 'magic eye' safety sensor option
- Maximises drive-through access
- Compact when coiled giving you increased storage space
- Just 270mm headroom requirement (300mm for larger sizes)
- Optional manual external release kit available
- Eight channel transmitter to activate your door and other compatible devices
- Class 5 wind load rating (Hurricane!)

Finishes

Please note that the colour of the bottom lath may vary slightly from the rest of the door. Teak and metallic bronze doors are supplied with a solid brown bottom lath and guides.

*Woodgrain doors are available for internal fitting only.

Thermaglide is a CE marking and building compliant garage door. It conforms to: BSEN13241-1:2003 applicable from 1st May 2005. CEN. The Machinery Directive and the Construction Products Directive.

Ear piercing 90dB forced lift alarm fitted as standard

Versatile...

All the features only smaller!

Where headroom is especially tight, the Thermaglide 55 has all the features of Thermaglide but requires only 205mm of headroom.

Looks good inside out!

The door can also be fitted to the exterior front face of the garage, the ideal solution for flat roof garages with no internal headroom. Better still, the lath has horizontal profile detailing to both concave and convex faces so doors fitted externally have the same attractive detailing as those fitted internally.

Finishes

Please note that the colour of the bottom lath may vary slightly from the rest of the door. Teak and metallic bronze doors are supplied with a solid brown bottom lath and guides.

Woodgrain doors are available for internal fitting only.
