Teckentrup 62 Swing Secure Garage Doors & Side Doors

Contemporary, High Performance

A classic, contemporary alternative, updated for today’s home with the option of certified security to the Secured by Design Police Preferred Specification, tested to LPS 1175 Issue 8 A1 [SR1].

See pages 22 - 27
CarTeck Side Hinged Garage Doors

CarTeck Centre Ribbed Smooth - Jet Black with lipped threshold option
Simply the best

Teckentrup side hinged garage doors and personnel doors are quite simply the very best. The solid panels, engineered hollow section aluminium frames and high grade fittings result in a door that closes with a reassuringly deep “clunk”.

Security is excellent and the range of styles, finishes and windows allows personalisation to suit your tastes. 1/2 and 1/2 opening and asymmetric configurations further increase the doors’ versatility.

Neat inside too

The inside of the door is very presentable. There are no unsightly bracings just a wipe clean surface finished in a practical grey white stucco texture (RAL 9002).

EN 14351-1
Our doors are independently tested and certified to all current safety legislation and carry a CE mark.
High quality hinges
Aluminium hinges with secured hinge bolts make it extremely difficult to lever open the door and are easily adjusted. Two or three hinges are fitted to each leaf dependent on size.

Double weather strips and mitred corners
In addition to the circumferential weather strip around the door leaf, the door frame has a three-sided weather strip for excellent draught reduction. Profiles are mitre jointed for a neat finish.

Standard threshold
The aluminium profile supplied as standard, provides a simple low profile threshold.

Door stays
These top grade, spring dampened stays hold the door securely in the open position. A simple de-latch motion releases the held door leaf. Any leaf below 780mm wide (including asymmetric side hinged doors) will not have a stay.

Note - not designed for high wind applications.
**Flush bolt security**
The inactive leaf is secured with flush bolts to the top and bottom of the leaf. The picture on the left also shows the rot proof floor weather strip and the inner rebate.

**Stainless steel handles and security locking**
High grade stainless steel handles and lock covers are tough and attractive, whilst the latch and dead bolt combination provides dependable security. A convenient thumb turn operates the lock from the inside.

The inactive leaf incorporates a stainless steel strike plate and steel lock keep box for added attack resistance. If you have a specific hardware requirement, talk to us as alternative designs can often be accommodated.

**Security keys**
Each door includes two security keys. Security keys add extra security by preventing unauthorised copying. They cannot be cut by anyone other than the issuer of the key - Teckentrup.

**Lipped threshold option**
For improved weather protection, a stepped aluminium threshold with a bulb weather strip is available as an optional extra. The door leaves close against the raised weather strip creating an improved barrier to dust and debris. The threshold includes a thermal break reducing heat transfer.

**Triple point locking option**
The active leaf is available with three point locking for greatly enhanced security. The locks provide enhanced strength to combat attempts to force them apart.

**Guarantee:** All doors have a 2 year guarantee against mechanical defects and a 10 year guarantee against perforation of the door panel. Terms and conditions apply, visit www.teckentrup.co.uk for details.

Make the most of light

Scratch-resistant, 20mm double glazed, easy-clean windows in attractive designs allow natural light into your garage.

Each style is available with clear, frosted or satin glazing. The window units are fitted with a polyurethane frame that is coloured to match or compliment the panel colour of the door. For Aluminium and LED windows, see page 18-19.

Teckentrup side hinged doors are manufactured to high standards and it is always our intention to market our products in an honest fashion. The above table is shown to illustrate that we make no performance claims that can be measured against the identified standards. Whilst our door panels have a rigid foam core, the hollow section frame and the attachment of hardware act as a thermal bridge between the inner and outer surface and, as such, we make no claims for insulating properties.

Note: The data is provided as a guide only as variances will occur with panel design.

Installation behind the soffit, only inward opening

Installation within the soffit, inward or outward opening

**Georgian Doors**

Horizontal doors have 2 columns of features as standard arranged 1/2 - 1/2, changing to an asymmetric three columns at the width shown right. 1/2 - 1/2 vertical doors have 2 rows of features as standard changing to three at the height shown right.

**Colour** The door frame colour shade and surface lustre will show a variance from the panel finish as the base material and coating methods are different. Where differing materials and process are adopted, such as side hinged GSW 40L garage doors, there may be some colour matching variations. Differing light conditions may further reduce or highlight this effect. The colours RAL 9006 and 9007 pose particular problems when colour matching, more information is available via the sales office. Please Note: Where doors are exposed to direct sunlight dark colours should be avoided. Colours will be similar to the RAL references stated and colours shown in this brochure and are approximations only and limited by the printing process.

Teckentrup 62 Swing Secure Garage

Warranty
2-year manufacturer’s warranty residential use
1-year manufacturer’s warranty commercial use
- on panels against rust penetration from inside to outside
- on material and manufacturing flaws of all non-moving parts of the frame that are verifiably unusable or whose usability is substantially compromised
- on floor seal, intermediate seals and frame seals against rotting

The guarantee does not apply to doors which are subjected to extreme conditions, e.g. corrosive influences resulting from use in a coastal climate with high salt content. Terms and conditions apply, visit www.teckentrup.co.uk for details.

Stylish, secure
A classic, updated

Teckentrup 62-2 Swing Secure Garage Door
Double leaf versions provide easy access and performance comparable to your front door.

Teckentrup 62-1 Swing Secure
Single leaf versions for side access to your garage.

06/2020
The main entrance doors to homes are becoming more attractive and high performance. Hinged swing garage doors, whilst still popular, are limited in choice and performance.

The Teckentrup 62 Swing Secure brings crisp aesthetics and comparable performance to the main entrance door; Thermal Transmittance, Resistance to Windload, Watertightness, Air Permeability and Operating Forces are all certified in these high performance doors.

Add to this, the option of certified security to the Secured by Design Police Preferred Specification, tested to LPS 1175 Issue 8 A1 [SR1] and Teckentrup 62 Swing Secure garage doors are a classic, updated for today’s homes. The superb build quality of the double leaf doors is complemented by matching single leaf doors for side or rear access to your garage space.
A black lever handle and security keyed cylinder is the standard configuration for all doors. Stainless steel is available as an option - see image on page 6.

Stainless steel pull handles in two lengths can also be added in singles or pairs to add a striking contemporary look to your door.

For extra special design accents, see our Bling section on pages 20 - 21.
High Grade Window Options

All window units are double glazed and available with clear glazing for vision or frosted glazing to allow light in with privacy.

Glazing sizes:
- 230mm x 1360mm
- 545mm x 354mm
- 300mm x 300mm
- 300mm diameter

Windows are available with colour matched inserts and fixings or with Anodised Aluminium surrounds with concealed fixings.

Hinge Options

KO hinges are supplied as standard and are matched to the door colour.

Stainless steel hinges are available as an option.

Security Options

Add certified security to The Secured by Design Police Preferred Specification.

KO hinges are supplied as standard and are matched to the door colour.

Stainless steel hinges are available as an option.

Tested to LPS 1175 Issue 8 A1 (SR1)
High Quality
Built to Last

U VALUE 1.4 Wm$^2$K*

The U value of the door confirms its insulation capability. The value is for a complete door with frame and is exceptionally low (which is good!).

Automatic Quality

Every Teckentrup 62 Swing Secure is made to order in our automated production facility that operates to quality procedures audited to BS EN ISO 9001: 2008. We care about the environment too - this is why all of our products are certified in accordance with the Environmental Product Declaration (EPD).

Certified Performance

The door and frame are CE marked and have been independently tested to have the following impressive characteristics:

- **Insulation (Thermal Transmittance)**
  - EN 13241-1 B: 1.4 Wm$^2$K

- **Resistance to Windload**
  - EN 12424:Class 2

- **Watertightness**
  - EN 12425:Class 2

- **Air Permeability**
  - EN 12426:Class 2

- **Operating Forces**
  - EN 12604: 150N

- **Operating Cycles**
  - EN1191 C5 [200,000]

Secured by Design Police Preferred Specification

Tested to LPS 1175 Issue 8 A1 (SR1)
The block frame is the standard frame design. Provided with Rockwool filling.

The FB Frame option allows for a flush finish between door lip, frame and wall finish on Corner and Corner Counter frames in new openings that are rendered after the door is installed. The FB option also provides a flush finish on block frames that are fixed at the front edge of the garage opening reveal.

The inactive leaf is secured with flush bolts to the top and bottom of the leaf.

The innovative corner frame wraps around the front corner of the garage opening providing a neat edge. Its slim profile also gives an additional 56 mm drive through width compared to a block frame.

Requires back-filling with a foam sealant.

Door frames are available with independently certified security to the Secured by Design Police Preferred Standard, tested to LPS 1175 Issue 8 A1 (SR1).

Hold Open Stays
Double doors have foot activated stays to hold the door in the open position.

Please note - stays are not designed for high wind applications.

Rain-guard
An anodised aluminium rain-guard is supplied with all doors to help limit water ingress at the top of the door.

Frames
Every door is supplied with a frame. A ‘block frame’ is the standard option with two variants, the ‘Corner Frame’ and the ‘Corner Counter Frame’. Each frame is made from heavy gauge corrosion protected steel and provides a stable platform for the door to operate.

The Complete Solution

Alternative or complimentary

Side Hinged and Sectional Garage Doors

Side hinged doors are an alternative to sectional doors but can also compliment them with matching side access. Getting your lawn mower out of the garage? A side hinged door is perfect and, for ride on mowers, a pair of doors allows drive in access.

Outstanding products, British company

Teckentrup is a family business with operations throughout the world and manufactures side hinged garage doors, personnel doors, sectional garage doors, steel hinged doorsets and industrial doors.

Teckentrup UK is a British company that takes German engineering excellence and adds British know-how to produce a unique range of high quality domestic, commercial and industrial products!

In the UK we make our garage doors in Warrington, Cheshire. Our garage doors are available through a national network of independent Garage Door Specialist Installers.
