

## markilux 6000

The cassette awning with excellent design characteristics –  
the innovative awning with a wealth of options

rated to wind resistance class 2  
(corresponds to Beaufort 5)

[www.markilux.com](http://www.markilux.com)

**markilux**

side view with awning retracted, face fixture

side view with awning retracted, top fixture

wall sealing profile (optional)

markilux spotlights in the front profile (optional)

shadeplus / drop valance retracted (optional)

shadeplus / drop valance integrated into the front profile (optional)

gutter with hidden water spouts

bionic tendon and cable conduit hidden in the arms

### Design Features

a top class full cassette awning in an appealing design. Presented with the Red Dot Design Award

the possibility of mixing and matching the colour of the cassette with that of the end cap trim and the end cap insert make the markilux 6000 a personally individual awning

for long-lasting beauty the cassette and frame are powder coated

the cover profile is in the same colour as the cassette; this gives the unit a closed appearance even when the awning is extended

elegant bracket cowling; design down to the last detail

### Technical Specification

when closed the folding arms are protected from the weather by the cassette

unique arm technology with power transference by way of the high tensile strength bionic tendon made of high-tech fibres, achieving at least 50,000 flexions in tests by the Fraunhofer Institute

front profile with integrated gutter and hidden water drainage spouts

the spring tensioners – which have been matched to the arm length – provide ideal cover tension

simple pitch adjustment via the bracket without the need to readjust the front profile

### Optional Accessories

the shadeplus creates an additional room on the patio. Protection from the sun, the wind and inquisitive glances all in one

radio-controlled motor with radio remote control for ease of use

hard-wired motor operation (optionally with automatic weather controls) for straightforward and easy operation

the lighting tastefully integrated into the front profile provides for a wonderful atmosphere on the patio

in the case of manual operation ease of use is ensured with the spring-assisted gearbox

awning available in non-standard RAL colours

awnings with 2 folding arms are available with the innovative silentec technology

### Lounge colours

off-white textured finish 5233

stone grey metallic 5215

	400 1) 2)	-	-	-	-	-	3)				-	468	455	697	-	-

dimensions in cm

- 1) a shadeplus / drop valance is not possible
- 3) please note the minimum widths!

- 2) awnings with 3 arms or a projection of 400 cm are only available with motor
- 4) At a projection of 350 cm and an awning width from 650 to 655 cm:  
It is not possible to fit the decorative caps to the top fixture and eaves fixture brackets

Due to the compact awning construction and depending on the width and the projection, contact between cover and folding arms may occur during extension and retraction. This does not have a detrimental effect on the functionality and/or durability of the awning.

#### Operation / Drive

	standard	optional
manual operation	<input checked="" type="checkbox"/>	-
servo-assisted operation	-	<input checked="" type="checkbox"/>

1) up to a maximum awning pitch of 35°

Dimensions and tolerances

	width	projection
housing tolerances	+5/-5 mm	±40 mm
awning cover width = awning width	-210 mm	
awning cover length = awning projection		+100 mm

Additional Information

The width of the awning cover is always **less** than that of the awning. Please refer cover sizes in the case of coupled units and those with more than 2 arms to us.

Awning pitch range:

from 5° to 35° or 36° to 70° (to the horizontal).

Definition of projection:

Please consult the section „Technical Information“.

In the case of manual operation approximately **16 winding handle revolutions can be assumed per metre of awning projection.**

It takes approximately **12 seconds per metre** to extend the awning in the case of **motor-driven units.**

**Definition of shadeplus drop:** The shadeplus drop is measured from the bottom edge of the Shadeplus profile to the bottom edge of the valance profile. Due to fabric thickness tolerances the actual drop may be shorter than the nominal drop by up to 5 cm.

A shadeplus is not available with sunsilk perla FR, sunvas perla or PVC covers.

**Coupled folding-arm awnings** are available up to a **max. of 3 single units side by side**, however only with a **maximum of 6 folding arms and only operated by motor.**

A coupled unit is available with **junction roller.** Pattern repeat mismatches are possible in the case of junction roller covers. A junction roller may not fit when the projection is the maximum for the width of each awning. (see also the section on „Installation“, the arm separation table).

If coupled awnings are fitted into a **recess or reveal** the overall width of the coupled awning must be at least 6 cm less than the width of the opening to allow the awning to be coupled.

Except for the shadeplus, radio control motors are available in io technology – see the section „Optional Accessories“.

HT	2			3			4				2			3			4			
BM	8			12			16				8			12			16			

The shear force is calculated on the basis of 2 fixing points per bracket, because – depending on the roof pitch – it cannot be guaranteed that 4 fixing points per bracket can be used.

- M = awning width
- H = projection
- Md = torque value for the bracket in the immediate vicinity of the arm
- HT = no. of brackets
- FS = shear force
- BM = no. of fixing points

At an awning pitch of more than 46 degrees to the horizontal, it is necessary, in the case of awnings fitted with a motor with manual override, to have an accessible area at least 60 cm deep behind the awning so the awning can be operated manually.

with eaves fixture bracket 150 mm (74944.)

with eaves fixture bracket 270 mm (74970.)

### Eaves fixture with additional spreader / backing plate

If the brackets cannot be positioned in accordance with this table, make sure the actual measurements are noted on the order form!

1) = Please note the minimum widths, only possible with a junction roller at a width of 700 cm.

2) = Please note the minimum widths, coupled units are not possible.

3) = arm position for awnings with spotlights

A = arm position

B = arm position

BHT = bracket width

DA = eaves fixture

DE = top fixture

H = projection

HT = no. of brackets

KM = minimum awning width

LR = a rolltex bearing with accompanying bracket is always placed under a central seam

M = awning width

MB = bracket fixture range

SB = standard width

W = face fixture

ZB = intermediate width

## Spotlighting

### Possible number of spotlights

widths [cm]	150	200	250	300	350	400
238 – 250	2	–	–	–	–	–
251 – 277	–	–	–	–	–	–
278 – 287	3	–	–	–	–	–

658 – 687	6*	6*	6*	6*	–	–
688 – 700	6*	6*	6*	6*	6*	–

Up to six spotlights can be fitted to the front profile. They can be adjusted individually so that the area under the whole awning can be bathed in a pleasant light according to your requirements.

The addition of a dimmer makes it possible to regulate the light intensity yourself. An integrated timer ensures that the spotlights are turned off automatically after six hours.

The lighting can be reactivated by double-clicking either the switch or the remote control.

The table on the left allows you to determine how many spotlights we supply in the dimensions shown. Due to the fact that the folding arms retract into the front profile this type of lighting is not available in some awning sizes.

Coupled units on request.

\* = spotlight distribution in the case of 3 folding arms

### Spotlight distribution, 2 folding arms

No. of spotlights	Spotlight distribution in the front profile
2	
3	
4	
6	

### Spotlight distribution, 3 folding arms

No. of spotlights	Spotlight distribution in the front profile
6	

### Spotlight operation

	standard	optional
standard on/off switch	<input checked="" type="checkbox"/>	–
radio-controlled dimmer	–	<input checked="" type="checkbox"/>
RTS operation on/off	–	<input checked="" type="checkbox"/>

### Technical specification

operating voltage	230 V, 50 Hz
spotlight power output	20 W
bulbs	OSRAM Decostar 35S (12 V)
power supply cable	3 × 1 mm <sup>2</sup>
No. of transformers	1 (in the case of 2 or 3 spotlights), 2 (in the case of 4 or 6 spotlights)
