The Benefits:

RELIABLE & RESILIENT

The **STRONGHAUS Sectional** can withstand the harshest environments, including the equivalent of **15 years of operation** in coastal areas, and heavily polluted industrial regions. In short, this door has **incredible** resilience and will maintain its integrity and attractive appearance.

WELL INSULATED

The Stronghaus sectional door has the same insulation properties as a double brick wall, but with a staggering 15x reduced thickness, making it the same level of insulation, if not more insulation than the rest of a standard garage structure. **U=1,35 W/(m²K)**

SILENT MOVEMENT

Far smoother motion with unique **ball race bearings** in the rollers. This is a **significant upgrade** on most doors, and it majorly reduces the noise of the door. The bearings are closed off from dust and moisture, and do not require lubrication, which also saves on mess and maintenance.

PROTECTED SIDES

In heavy rainfall, water can collect at the bottom of doors. The plastic base of the side profile **minimises the possibility of corrosion** in high humidity. All while providing an attractive appearance for both door panels and for the frame.

Colours:

All Sectional **STRONGHAUS** Doors are available in **23 RAL** colours (see right) as standard. However, on request you can select your door in **any RAL** colour of your choosing, or even one of three timber effect finishes (see below) for an **incredibly realistic** timber look that is more durable than the real thing.

Styles:

LARGE PANEL DESIGN

The lines seen on the Large Panel door design are simply those that define the separate sections, you will count three on an average height garage door.

This makes for a smooth unblemished design for each panel, providing a modern, clean look to the door at any size, making it the perfect choice for contemporary homes.

The wide and clean panels of this design will emphasise the style of your home or present the most minimalistic effect.

Styles:

MEDIUM PANEL DESIGN

Continually popular due to its design diversity, the Medium Panel option works with any surface finish and colour, and therefore suitable for almost any style of property.

There is one horizontal line per panel, providing seven lines across for an average-sized door.

This harmonised design provides a base for any style to appear flawlessly.

This design provides a base for any choice of surface finish to be shown off to its full effect.

Styles:

SMALL PANEL DESIGN

Characterised by its concise ribbed design, the Small Panel design features three horizontal ribs per standard panel.

With a more textured aesthetic, this door option is especially ideal in a woodgrain effect or traditional colour, which can even create the effect of boarding or timber cladding. Such an appearance complements many styles of traditional homes and garages.

Traditional horizontal boarding effect and great for period properties.

Styles:

GEORGIAN PANEL DESIGN

Drawing influence from architectural styles of the 18th and 19th century, the Georgian Panel door offers an alternative design of traditional style.

With emphasis on classic character, this door features Georgian panelling that complements period properties with timeless charm.

Bring the modern technology and convenience of the Stronghaus to period properties with this classic Georgian Panel design.

Wave Design:

The wave design on the Stronghaus is a subtle and attractive style for a clean but quality style

SECTIONAL GARAGE DOOR MADE FROM WAVE DESIGN PANELS

(SEE LEFT)

WAVE DESIGN

(SEE BELOW)

Enhance the modern appearance of your home by adding a subtle wave styled door to your garage. The fine appearance of the panels combined with a modern minimalist exterior can perfectly complete any property, with a nod towards a natural wooden texture but with a sophisticated twist.

The wave design can compliment a number of themes and styles, and maintains its appearance year after year.

Wicket Door:

Built in wicket doors are a practical and convenient solution. It allows you to enter into the garage without opening the garage door, saving time and effort.

SUBTLE & ELEGANT DESIGN

Wicket threshold is only 18-20 mm. Due to its shape such a threshold ensures maximum convenience in the process of operation. A flat threshold provides unhampered passing for bicycles and carts through the wicket. Maximum dimensions of doors with wicket are 5000×3000mm.

Why Stronghaus?

Why should I pick the stronghaus sectional door?

With the market leading positives in insulation, opening speed, protection and style choices, the Stronghaus should already be your go-to sectional door, we also understand that sometimes a simple & modern operator solution is preferable in a home, so this is why we also have the following:

INTRODUCING LEVIGATO An exclusive range of operators

PERFECTLY PAIRED DESIGN

With Stronghaus's determined dedication to premium doors, they must only be paired with an operator of the same quality and power.

The Levigato operator not only offers sleek, pebble-style operators and handsets, but also technology driven from premium brands. To achieve exceptional results for the Levigato, it has been constructed alongside Pininfarina, whose automotive customers include the likes of Ferrari and Rolls-Royce.

The Levigato allows you to effortlessly open your Stronghaus sectional door in style at the press of a button, with smooth operation every time. It features a galvanised steel motor rail, for durable strength, as well as a tough mechanism to keep the door locked down and secure when closed.

With a 5-year motor warranty, the Levigato assures seamless operation, peace of mind and reliability, in addition to its smooth functionality.
